You dream big.
You long to discover new adventures and exciting opportunities.
You do everything with passion and determination.

There’s a place for people like you.

SUNY Oswego.
reach beyond your expectation.

...
Big school resources and opportunities in a supportive community.

**Marano Campus Center**
Our activity complex features a 2,500 seat convocation center/ice arena, a 200-seat auditorium, College Store, food court, student organizations, academic support services, and more.

**Penfield Library**
One of the largest libraries in the region, with vast electronic database resources, Wi-Fi, a 24-hour study room, and a great café.

**Global Laboratory**
Our innovative undergraduate research experience offers hands-on opportunities at international science laboratories. Recent placements have included Brazil, Costa Rica, India, Republic of the Congo, and Taiwan. See [oswego.edu/globallaboratory](http://oswego.edu/globallaboratory).

**State-of-the-Art Research and Teaching Labs**
Learn on the same equipment and software used in today’s workplace at the LEED-certified, environmentally friendly $118 million Shineman Center for Science, Engineering, and Innovation.

**Print and Broadcast Facilities**
Student-run media include WTOP-TV, WNYO-FM, *The Oswegonian* campus newspaper, the *Ontarian* yearbook, and other publications. Students also actively participate in our professionally directed NPR affiliate, WRVO-FM.

**Athletic Facilities**
Includes the Convocation Center Ice Arena, Romney Fieldhouse including a multisport turf playing surface and 200-meter track, a new outdoor turf stadium for field sports, and Laker Hall’s Max Ziel gymnasium.

**Rice Creek Field Station**
300 acres of trail-crossed fields, streams, and forests, including 30-acre Rice Pond, an indoor viewing gallery, and classroom and lab space.

**And All the Comforts of Home**
Live, study, and play in:
- 12 residence halls and Village Townhouses
- 5 resident dining centers
- 2 athletic complexes
- 2 fitness centers
- Fallbrook Recreational Center
- Mary Walker Health Center
By the end of my freshman year, I was assistant news director of the campus radio station at Oswego—friends at other universities never touched a piece of equipment until their senior year."

Al Roker '76
Communication Studies
Weather and Feature Reporter, NBC's Today Show
Best-Selling Author
New York, New York

Princeton Review and USA Today name Oswego among the 150 “best value” colleges and universities in the nation.

Oswego ranked 17th on the U.S. News list of 50 best public campuses in the Northern Region.
About 55% of our classes have fewer than 20 students and nearly 86% have fewer than 40. Even with about 6,800 full-time undergraduates, our median class size is 24 and our student-to-teacher ratio is 18:1.

4 schools, more than 500 professors, and over 110 majors and concentrations.
Everything from Accounting to Zoology
SUNY Oswego’s four schools include:
- College of Liberal Arts and Sciences
- School of Business
- School of Communication, Media and the Arts
- School of Education

Together, they offer more than 110 major, minor, cooperative, and pre-professional options.

You can also combine majors, add up to two minors, or concentrate your study in specific areas through your choice of electives and other courses that satisfy your General Education requirements.

Outstanding Faculty
Approximately 88% of Oswego’s full-time faculty—which includes Fulbright scholars, noted researchers, and gifted artists and writers—hold doctoral or other highest degrees in their fields.

Our faculty’s commitment to you includes time outside the classroom—whether you have questions about course work, require extra help with assignments, or simply need advice.

“The faculty at Oswego comes to each class prepared and willing to help students, which left me feeling inspired, respected, and supported.”

Amy Lalonde ’12
Applied Mathematics
PhD. Student, Biostatistics

Expand your reach.

**Technological Resources**

Enjoy the latest technological resources throughout campus:

- **Technology Services** supports over 1,000 PCs and Macs available in 10 public-access computer labs and 40 specialized departmental labs.
- **Campus-wide wireless Internet** in residence halls and labs, and in classrooms that also offer state-of-the-art audio, video, graphic, and computer-imaging resources.
- **Scientific research labs** feature the latest instrumentation, including the only Varian 820MS inductively coupled plasma mass spectrometer in the SUNY system.
- **Broadcasting facilities** include WNYO student radio, WTOP student television, and WRVO-FM—our award-winning, professionally run National Public Radio station.

**Honors Program**

SUNY Oswego’s college-wide Honors Program features specially prepared courses designed to stimulate your intellectual growth, sharpen your analytical abilities, and satisfy your General Education requirements. Honors students represent majors from all schools and programs in a lively, thought-provoking environment, and work closely with faculty mentors on research or creative projects. Several departments also offer honors opportunities in their own disciplines.

Check out oswego.edu/honors.

“SUNY Oswego provided me the motivation to better myself in every aspect of my life.”

Study Abroad

Have you ever dreamed of a semester in London? A year in Tokyo? A winter (really summer!) in Australia? Or spring break in the Bahamas?

With very affordable costs and courses in every major, SUNY Oswego’s international programs can help you make it a reality.

We’re ranked among the nation’s elite programs by the Institute for International Education, with over 450 students traveling abroad each year.

Check out oswego.edu/international.
Welcome Torchlight Ceremony
The excitement of your first year.

Making a smooth transition

Right now is the best time to visit our campus, speak with our admissions counselors, and take a tour. Schedule your visit online and take a virtual tour at oswego.edu/admissions.

Once you enroll, you’ll participate in an orientation program where you can confirm your first-semester classes, attend workshops, and meet future classmates and friends.

On move-in day, you’ll be greeted by your residence hall’s welcome crew. They’ll help you unpack your car, take everything to your room, and show you around.

First Year Programs

- The First-Year Advisement Program supports you with a First-Year Advisor and an upper-class student to help you make crucial decisions. For more, see: oswego.edu/firstyear/advisement.
- The FirstChoice Academic Experience offers you a small 19-student course that combines campus and community resources with academic topics. Meet your specific needs and interests by choosing from 80 different courses. For more, go to: oswego.edu/firstchoice.
- First-Year Living and Learning Communities help you make new friends and share learning experiences by living in the same building and taking integrated classes. See: oswego.edu/firstchoice/learningcommunities.
- The First-Year Residential Experience (FYRE) in Johnson Hall provides structured programs and activities that encourage academic excellence, campus involvement, and community interaction. See: oswego.edu/fyre.

Discover more about Oswego’s First Year Programs at: oswego.edu/firstyear.

Get the most out of your education and plan for your career at the Compass. See page 22 or visit oswego.edu/compass.

“I absolutely fell in love with the campus and the people once I set foot here. I’m so happy to be a part of the Laker family.”

KEY
MAJOR PROGRAM
* Minor Program
** Major and Minor Program
Area of study or emphasis within degree program
+ Portfolio review required
*** Also includes a five-year combined B.A./M.B.A. in Business Administration
E Evening degree option offered
H Honors program is available in this discipline.
College-wide Honors Program also available.
O Online option offered
S With SUNY Upstate Medical University, Syracuse, NY
Pre-professional advisement for law and the health professions is also available.
All programs result in Bachelors of Arts, Bachelors of Science, or Bachelors of Fine Arts from Oswego or from cooperating college.
Choose from 37 majors, 41 minors, two cooperative degree programs, numerous honors programs, and several special-interest tracks.

Undecided? The College of Liberal Arts and Sciences gives you up to two years to try different majors—so explore, take courses in different disciplines, and decide what interests you.

**Round out your education**

Interdisciplinary majors combine courses from various departments into a single program so you can study several different disciplines in a larger context.

For example, our American Studies major draws on seven departments—Anthropology, Sociology, Economics, English, History, Philosophy, and Political Science—to provide an all-encompassing view of the American experience.

To learn more about majors and other opportunities, build your own custom guidebook at guidebook.oswego.edu.

“You can’t go to Oswego, right on Lake Ontario, and not be inspired. The setting plays an integral part in the education you receive.”

Kendis Gibson ’94
Political Science
National News Correspondent
ABC News
New York, New York
American Studies Drawing on the resources of many academic departments, American Studies investigates the complex culture of the United States from diverse and interconnected historical, political, literary, and artistic perspectives. The program can be tailored to your interests, and culminates with a senior seminar concentrating on an aspect or period of American life.

Anthropology Anthropologists draw on cultural history, human evolution, ecology, linguistics, and the comparative study of biological and cultural differences among human beings. Students develop an informed viewpoint about other peoples of the world—and themselves—that is both practical and personally enriching.

Biochemistry Biochemists study the chemical components of living creatures—from viruses to mammals—and explore the molecular nature of cells, study the development of illnesses, search for new drugs, predict undeveloped/inherited health problems, and help forensic experts identify criminals. For students who wish to pursue graduate study, attend health-related professional schools, and or work in entry-level positions at laboratories or in pharmaceutical and biotechnology industries.

Biology The study of living organisms—bacteria and cyanobacteria, protists, fungi, plants, and animals—and their life processes. Classroom discussion and laboratory work examine the unifying principles of inheritance, development, structure, function, classification, behavior, environments, populations, and evolution to build a solid foundation in the field.

Chemistry The study of the structure of matter and the changes it undergoes. Recognized as one of the country’s outstanding undergraduate programs, marked by excellence and diversity. For a career as a professional chemist, our B.S. offers tracks in Chemistry, Biochemistry, and Environmental Chemistry, and satisfies ACS certification requirements. The B.A. combines a liberal arts education with an emphasis on chemistry.

Cinema And Screen Studies A rigorous course of study in the history, theory, and criticism of cinema—as well as of new and pre-cinematic screen media—combined with a four-course sequence in screenwriting and digital film production. Interdisciplinary options link studies of moving images to developments in cognitive science, computer and information sciences, and the other humanities, fine arts, and social sciences.

Cognitive Science An interdisciplinary study of the mind with an emphasis on the interaction of people with computers. Drawing on research methods associated with psychology, computer science (artificial intelligence), linguistics, philosophy, anthropology, and biology, cognitive scientists focus on various aspects of processing, problem solving, and planning. In addition to learning more about themselves, students will be better equipped for success in our technologically vibrant society.

Computer Science The study of the theories of information and computer systems and their applications in today’s society. One of the oldest registered programs in New York State, our major combines a sound theoretical foundation with a high level of practical experience. It offers advanced hardware and software, faculty with diverse professional interests, and opportunities to gain real-life experience.

Creative Writing This intensive program allows you to explore and refine your writing skills in fiction, poetry, creative nonfiction, playwriting, and screenwriting. Study with accomplished writers/professors as you move from introductory courses to advanced workshops. Critical thinking and communication skills are key components of all coursework.

Economics In studying how individuals and societies use scarce resources to satisfy their wants and needs, this major addresses production, consumption, saving, and investment under various social and economic conditions—and how our choices affect the quality of life for present and future generations. The goal: a firm grounding in modern economic theory, a basic understanding of the U.S. and world economies, and a developed capacity for quantitative research and independent thought.

Electrical and Computer Engineering (ECE) The ECE BS degree program provides a well-rounded engineering education while including deeper studies in four high-demand concentrations: embedded systems, robotics, biomedical instrumentation, and modern energy systems. The program meets all requirements for program accreditation by ABET, and prepares students for successful careers in engineering and related disciplines, as well as the successful pursuit of graduate studies.

English This discipline cultivates the practices of reading and writing while posing questions about their history, meaning, and significance. To read carefully and analytically, to write clearly and elegantly, to do both with conviction, and to make them matter in ways public and private, are the aims and enduring rewards of our program. While attending to a vast literary heritage and the literature of today, the English major emphasizes three integrated areas of study: analysis, research, and theory.

Gender and Women’s Studies Explore the diverse experiences, perspectives, culture, history, and significant contributions of women. This interdisciplinary major is designed to develop a broad understanding of the study of gender and women, investigate women’s contributions in all areas of academic scholarship, and explore the relationship between cultural definitions of feminine behavior and the realities of women’s lives.

Geochemistry The study of the chemical composition of the Earth and other planets provides the interdisciplinary background necessary to deal with the many complex problems of our world. Offered jointly by the departments of Earth Sciences and Chemistry, Geochemistry covers topics ranging from the chemical makeup of Venus to the search for oil here on Earth.

Geology Investigates the origin, history, composition, and structure of the Earth, enabling professional geologists to survey earthquakes and volcanoes; find oil, gas, and mineral resources; develop land-use plans; monitor rivers, lakes, and coastlines; and much more. Provides a foundation in the principles of geology and its related sciences. An optional interdisciplinary Environmental Earth Sciences track addresses important environmental issues, including climate change and sustainability of natural resources.
Global And International Studies  Draws on the expertise of numerous disciplines, and offers concentrations in global politics and governance, global political economy, global culture, and area studies. Intermediate proficiency in a non-English language is required of all majors, and study abroad is strongly advised. Seniors choose either a capstone seminar in their concentration or a relevant internship in an international area.

History  Provides you with a broad exposure to your own heritage, acquaints you with other cultures, and promotes an in-depth understanding of one historical area. Subjects include American, African, Asian, European, Latin American, and Middle Eastern history; social, intellectual, military, and political history; and gender and ethnic studies. Upper-level seminar courses develop writing, research, and organizational skills.

Human Development  Explore how people grow and change from birth through late adulthood. Encompasses the study of child and adolescent psychology, the fundamentals of gerontology, and techniques in research and data analysis. This applied, multidisciplinary program includes two internships and several courses outside the Psychology Department.

Information Science  Combines a strong technical component with coursework in the human aspects of computing to provide you with the skills to link people and technology. The technical component encompasses computer programming, database and text management systems, telecommunications, expert systems, and statistics. The human perspective includes assessing information needs and exploring the social effects of information systems.

Language And International Trade  Designed to prepare students for careers in multinational firms by providing interdisciplinary language skills, cultural information, and an understanding of the fundamental business and economic concepts that are essential in global management and marketing positions. This major also provides students with solid academic preparation for enrollment in either an MBA program or graduate study in foreign languages.

Linguistics  The study of the nature and structure of language is drawing increased attention for its practical applications and value as a theoretical science. The only program of its kind among four-year SUNY colleges, this major develops critical thinking, problem solving, and writing skills for the modern global marketplace, and incorporates anthropology, computer science, English, languages, philosophy, and psychology.

Mathematical Economics, Applied  This application of mathematics to the problems of production, consumption, and distribution is designed to train you as a quantitative economist ready to step into a research position in government or business. Course requirements and electives are divided equally between economic theory and mathematics, and include 12 semester hours of computer science.

Mathematics/Mathematics, Applied  Mathematicians are problem solvers—investigating problems, formulating questions, determining applicable mathematics, and communicating solutions. While our B.A. in Mathematics focuses on the theoretical aspects of the discipline, our B.S. in Applied Mathematics examines the practical applications in science and operations research.

Meteorology  Study the atmosphere and its physical and chemical characteristics, dynamic processes, weather patterns, and climate. Oswego’s Meteorology major—one of just a handful in the Northeast—has a national reputation, and requires specialized study in synoptic and dynamic meteorology, meso- and micrometeorology, atmospheric and cloud physics, climatology, instruments, and air pollution.

Modern Languages—French, German, Spanish  In a global society, the study of languages, literatures, and cultures helps emphasize similarities and improve communication between people and nations. Our department—one of the largest in the SUNY system—offers majors and minors in French, German, and Spanish, and a minor in Italian. Students can immerse themselves in languages and cultures through overseas study in Italy, France, Germany, Spain, Latin America, and more.

Philosophy  The reasoned examination of such values as justice, equality, rationality, and truth offers intellectual challenge and growth. Learn to communicate clearly, present logical arguments, imagine diverse possibilities, defend a position, and appreciate alternative points of view—skills important to your employability, professional advancement, and ultimate satisfaction in life.

Philosophy-Psychology  Encompasses both disciplines and how they interrelate, synthesizing two different perspectives of human understanding and creating a wider basis for effective thinking. It requires a central core of courses in philosophy and psychology, advanced studies that interrelate the two, and a senior seminar taught by both a philosopher and a psychologist.

Physics  The most basic of the natural sciences incorporates studies in motion, force, energy, matter, heat, sound, and light. Oswego’s B.A. program combines a broad liberal arts education with a substantial physics component. The B.S. places more emphasis on physics, establishing a foundation for graduate study in physics, electrical engineering, or mechanical engineering.

Political Science  Study the political behavior of leaders, citizens, and social groups and the formal institutions that carry out public policy, and develop understanding of the hows and whys of governing. Major and minor programs offer courses in the discipline’s five subfields—American Politics, Comparative Politics, International Politics, Political Theory, and Public Administration and Policy.

Psychology  The scientific study of human and animal behavior and how such knowledge can be applied is useful in many contexts, including health care, education, business, industry, sports, and law. Build on a solid foundation in general psychology and research methods with options in Health Psychology, Human Services, Cognitive Psychology, and Neuropsychology. Two optional, joint five-year B.A./Master’s programs result in a B.A. in Psychology and an M.B.A in Business, or a B.A. in Psychology and an M.A. in Human Computer Interaction.

Public Justice  Observe the criminal and civil justice systems and their associated professions from different perspectives—anthropological, economic, historical, philosophical, psychological, and sociological. Centered mainly in the social and behavioral sciences, the program combines a liberal arts education, in-depth study in your area of interest, and supervised fieldwork. Areas of study include Criminal Justice, Human Services, and Legal Studies.

Sociology  Seeks to explain social behavior and change by studying the human behavior of groups, how groups behave, and how people are influenced by the groups they belong to. Its scope ranges from the analysis of small-group behavior to the study of the development of large social systems—from the family to education, religion, government, and the economy.

Software Engineering  Students may earn a B.S. in engineering essentials as they gain fundamental knowledge in sciences, mathematics, and computing. The first of its kind offered by SUNY, this program meets all software engineering accreditation requirements, while it prepares you for work as a software engineer with expertise in engineering software systems.

Zoology  Combine laboratory and classroom experience to study animals from the cellular to the population level. Choose from two tracks. The first is for students whose major interests include anatomy, embryology, genetics, pre-med, pre-dental, pre-veterinary, or allied health. The second is for those drawn to ecology, invertebrate and vertebrate zoology, systematics, or zoo technology.
Cooperative Degree Programs
Two cooperative degree programs combine study at SUNY Oswego with three or more years at a cooperating college. Based on the program, you will receive two degrees—one from the cooperating college and a second from Oswego. Admission into a cooperative degree program does not guarantee admittance as a transfer to the cooperative (affiliated) college.

Physical Therapy 3+3
B.A. or B.S. from Oswego in Biology, including 53 credits of special prerequisite course work. Doctorate in Physical Therapy from SUNY Upstate Medical University (Syracuse, New York). Requires admission to Upstate Medical University prior to Oswego enrollment.

Pre-Optometry 3+4
B.A. in Chemistry from SUNY Oswego + O.D. in Optometry from SUNY College of Optometry (New York City)

Pre-Professional Programs
Those pursuing careers in law, medicine, dentistry, optometry, or veterinary science can complete the necessary prerequisites through careful selection of majors and electives. Oswego faculty are skilled in pre-professional advisement, and will work with you to design a program tailored to your career goals.

Learn more at oswego.edu/prelaw or oswego.edu/prehealth
School of Business

Prepare yourself for an international job market that’s more competitive, entrepreneurial, and fast-paced than ever.

Choose from flexible programs and majors rarely offered at other colleges—including Finance, Risk Management and Insurance, Human Resource Management, and a five-year combined B.S./M.B.A. degree in Accounting, the first of its kind in New York State.

You’ll learn and work in Rich Hall, a state-of-the-art facility. Our programs emphasize applied learning by combining class sessions with case studies, computer simulations, group projects, and internships/co-ops in some of the largest companies on the East Coast. You can also take advantage of overseas opportunities.

Our faculty brings real-world perspectives to the classroom—most have spent years in professional positions, and some continue to work as consultants in business, government, and not-for-profit sectors.

Unique Four-Year Learning Path
Enter as a freshman and begin taking business required courses such as economics and statistics right away, along with a core of liberal arts classes.

90% of graduates from SUNY Oswego’s School of Business find employment or enter graduate school in their chosen fields within six months.

AACSB International Accreditation
Our innovative and rigorous undergraduate and graduate programs have earned SUNY Oswego’s School of Business accreditation by AACSB International, the world’s premier accrediting agency for business schools.

Potential employers appreciate that this accreditation is based on professional standards recognized in a very select group of business schools—giving our graduates a significant boost in the career marketplace.

To learn more about majors and other opportunities, build your own custom guidebook at guidebook.oswego.edu.
**Accounting** Both our B.S. in Accounting and our five-year, combined B.S./M.B.A. program qualify you to sit for the C.P.A. examination in New York State. A rigorous curriculum prepares you to work in virtually any field or pursue an advanced degree; courses include accounting, business law, finance, business administration, and economics. The professional experience of award-winning faculty adds practical perspective to your study.

**Business Administration** As a degree in general management, this major incorporates study in the many aspects of modern business. Core subjects include management, accounting, marketing, organization, law, and finance. Specialization in a particular field—International Management, Manufacturing Management, Organizational Leadership, or Financial Services—leads to valuable, in-depth study. The department also supports a joint five-year combined B.A. in Psychology and M.B.A. program.

**Finance** In one of the few four-year finance programs offered in the Northeast, you’ll study the science of managing money, banking, investments, and credit. You’ll also gain exposure to such critical related fields as accounting, economics, quantitative methods, and general management. The teaching of this broad base of knowledge is supported by our faculty’s years of practical, professional experience.

**Human Resource Management** Only a handful of colleges nationwide offer a four-year degree in this burgeoning field. Although the program is relatively new, it has achieved widespread recognition for the breadth of study it offers. In addition to the management core, required courses include personnel staffing, collective bargaining, labor relations, compensation management, employment law, and social and industrial psychology.

**Marketing** Study the commercial functions involved in transferring goods from producer to consumer. Through such courses as Marketing Principles, Consumer Behavior, Marketing Research, and Advertising and Promotion, the program introduces concepts and tools employed by successful professionals. It also emphasizes team-oriented projects that enable you to apply various principles of marketing management to actual business problems.

**Operations Management and Information Systems** This interdisciplinary program focuses on quantitative or computing methods of management. There are three specializations: Decision Science prepares you for graduate study in quantitative methods; Management Information Systems teaches you to analyze, design, implement, and maintain the systems required to support an organization’s goals; and Operations Management provides analytical tools and techniques needed in production environments.

**Risk Management and Insurance** Gain the technical expertise and strategic vision to manage the risk of loss, including property, money, and life and health insurance. The program prepares graduates for careers in risk management and analysis, insurance underwriting, insurance management, and other related areas. Full-time faculty and risk management practitioners bring both theoretical and real-world applications to the classroom.

“Oswego is a hub of learning where anyone can expand his or her knowledge while feeling at home. I have always felt honored and lucky to be a part of the Oswego family.”

University of Toronto
Toronto, Canada
Use your talents to **explore, create, perform, plug in, and communicate** in a challenging atmosphere as you major in one of our core areas or study the integration of technology into an exciting array of media, arts, and communication.

Whether you’re interested in Art, Broadcasting and Mass Communication, Communication and Social Interaction, Graphic Design, Journalism, Music, Public Relations, or Theatre, you’ll find that we offer a rich selection of classes, learning opportunities, and career directions to better prepare you for whatever is on the horizon.

- Explore all the possibilities of your major through class work and studios, cultural events on campus, internships, and study abroad. Courses even include emerging fields like new media and MIDI sound design.
- Work side by side with students and faculty in projects designed to help focus your interests—and with a trained advisor who will help you select the best courses to meet your goals.
- Immerse yourself in Oswego’s vibrant arts scene. From theatrical productions to film series—and from art showings to the opera, symphony, and dance—the Oswego arts community is a rich cultural center for the college and the region.
- Express yourself at one of our two FM radio stations, or the Al Roker ’76 WTOP TV—our student television studio. Take part in one of the student music ensembles, the Blackfriars theatre group, our award-winning student newspaper *The Oswegonian*, vocal groups, and so much more.

The School of Communication, Media and the Arts will help you gain a deep understanding of your field of interest—then connect to jobs, graduate studies, and a rewarding future.

“In four short years, Oswego taught me more about succeeding and thriving in life then I could have imagined.”

Sarah Argus ’12
Graphic Design/ Psychology
MS Communication Design- Pratt Institute
Queens, New York
Art This study encompasses the creation of visual objects as well as investigation into their social context, their past, and their meaning in art history. The result is a thorough understanding of the creative process. Degree options include a B.A. with an emphasis in Art History, Studio, and Graphic Design; a B.F.A. with tracks in Art Studio or Graphic Design; minors in Art, Art History, Museum Studies, Photography, and an M.A.T. in Studio Art.

Broadcasting and Mass Communication Develop an understanding of the evolving mass-media industries, including radio, television, cable, print media, film, Internet, and multimedia. Choose study in a traditional campus setting or online. Facilities include television studios, videotape editing suites, a recording studio, and a link to a local cable access channel. Campus media—National Public Radio affiliate WRVO-FM, student-run WTOP-TV, WNYO-FM, and The Oswegonian—offer valuable extracurricular opportunities. A joint five year B.A./M.B.A (Business) is also available.

Communication and Social Interaction Explore the ways human beings interact and exchange ideas, feelings, and beliefs to build relationships and cooperate with others. Analyze the process of creating, sending, and interpreting verbal and nonverbal messages in one-to-one and group relationships. Studies include influences on communication such as gender, culture, conflict, ethics, cognition, and aging. Students may also focus on public communication, including public speaking, analysis of public messages, and the principles of persuasion and argumentation. Internships, independent studies, and other “capstone” experiences are encouraged.

Graphic Design A concentrated and structured program in the study of contemporary design, including intensive training in graphic design, studio art, art history, and museum studies. Designed to prepare students not only to become graphic designers, but artists who illustrate, photograph, sculpt, paint, print, and create computer and digital images. Students devote most of their junior year to a range of study in graphic design theory and practices in both print and multi-media. During this study, each prepares an individual print and electronic portfolio, leaving the senior year open for specialized study.

Journalism This exciting interdisciplinary program will teach you to gather, write, edit, package, and produce news in the age of information. It fosters critical thinking, research, and communication skills, encouraging their practice through participation in campus media and internships with numerous large- and small-market media outlets. The program also addresses the social, ethical, and legal contexts in which journalism is practiced in the United States.

Music Accredited by the National Association of Schools of Music. Through its five components—music history and literature, music theory, applied music, jazz studies, and music therapy—this program provides both music and non-music majors with many opportunities to study and perform. Learn to play an instrument, participate in various performing groups, take courses in music theory or literature, and attend concerts throughout the year.

Public Relations Establishing and maintaining an understanding between an organization and its publics to create cooperation and acceptance is the job of a Public Relations professional. Our program incorporates public opinion research, persuasive writing, graphics, working with the media, and ethical responsibility. Public Relations strategies and techniques are examined through case study.

Theatre This eclectic art form communicates intellectual and emotional experience through live performance. Our B.A. program offers concentrations in Acting, Design, Directing, History and Criticism, and Technical Theatre. Actual productions let you learn while doing—at least four major productions and numerous smaller-scale activities are presented, such as student theatre and a student-written play festival.

To learn more about majors and other opportunities, build your own custom guidebook at guidebook.oswego.edu.
School of Education

Innovation in learning has been a hallmark of SUNY Oswego since its founding as a teachers college in 1861.

This creative spirit still thrives in the School of Education, where pioneering methods grounded in research and field experiences help students become teachers, counselors, school leaders, and wellness and technical professionals ready to meet the challenges of today’s global and diverse institutions and communities.

The School of Education is accredited by the National Council for the Accreditation of Teacher Education (NCATE), assuring you that all of our programs meet rigorous national standards for:

- Breadth and depth of content knowledge and teaching skills
- Instructional quality, educational technology, and field placements
- Faculty scholarship and institutional support
- The capacity of our graduates to help all elementary through secondary students learn
- Preparation of professionals in the areas of technology, health, and wellness

Education for the Real World

When you enter the job market as a graduate of an NCATE-accredited institution, you’ll start head and shoulders above the competition. Our programs emphasize hands-on experiences in classrooms and professional sites. If you prepare to be a teacher, you’ll spend time in a variety of schools as early as your sophomore year, guided by master teachers and the faculty who teach your education courses. If your area is technology or wellness management, you’ll immerse yourself in field experiences and internships.

Student teaching placement is available throughout Central New York, in New York City, and in additional locations across the state. International opportunities include student teaching and global internships.

Oswego’s Teaching English to Speakers of Other Languages (TESOL) program is meeting the demand for English Language Teachers in the global marketplace.
Childhood Education (Grades 1-6) Leading to certification to teach Grades 1 to 6, this program combines a strong knowledge of the discipline with theory-based pedagogical courses. Sustained field placements in diverse settings provide authentic learning opportunities throughout the program. Concentrations include English, mathematics, modern language (French, German, Spanish), science, social studies, the arts, and women’s studies.

Adolescence Education (Grades 7-12) In addition to coursework in the liberal arts, this program requires study in a certification area (biology, chemistry, earth sciences, English, French, German, mathematics, physics, social studies, or Spanish) as well as in other arts and sciences. To teach at this level, educators must be as proficient in their discipline as they are in learning theories and adolescent development. Field placements in diverse school settings are required.

Teaching English to Speakers of Other Languages (TESOL: All Grades) Designed to prepare individuals to become specialized in teaching English to non-native English speakers, the program contains a core curriculum—including pedagogical courses, teaching experience, and an interdisciplinary concentration in linguistics.

Technology Education (All Grades) In addition to certification, this program is designed to give you the tools you need to guide tomorrow’s students in managing the technological innovations of the future. In our applied technology laboratories, you’ll be challenged to participate in authentic learning tasks—and start solving problems—through self-directed inquiry in the design and manufacture of various technological systems. Field placements in diverse school settings are required.

Vocational Teacher Preparation (All Grades) This program prepares those with vocational and technical backgrounds to teach occupational skills in high schools, trade schools, community colleges, agricultural and technical colleges, adult continuing education programs, the armed forces, and industry. Six B.S. programs lead to initial New York State Certification to teach Agricultural, Business and Marketing, Health Careers, Family and Consumer Science, Technical, and Trade Education. You can enter Business and Marketing Education and Family and Consumer Science as a freshman; other programs require an Associates degree in the technical field or trade you wish to teach, or a high school diploma and at least four consecutive years of field experience.

To learn more about majors and other opportunities, build your own guidebook at guidebook.oswego.edu.
Find your own horizons at the Compass.

Access the tools you need to learn about yourself—and develop vital skills to get the most out of your education and plan for your future—at the Compass, a one-stop resource for advisement and long-term academic and career preparation located in the Marano Campus Center.

**Explore and Discover:**
- Learn more about your interests, strengths, skills, values, and personality.
- Find the right academic major and minor for you.
- Discover the many careers that best match you and your major.

**Get Experience:**
- Get involved on and off campus with volunteer opportunities, internships, part-time jobs, co-ops, and more.
- Confirm your chosen path, obtain references, earn money and academic credit—and enjoy more choices.
- Become part of your campus, local, and global community through service, clubs, organizations, and more.

**Develop a tailored plan just for you:**
- Follow a structured but flexible program for success during college and beyond.
- Meet with professional staff for help getting started and moving forward.

**Develop Your Professional Presence:**
- Learn how to articulate your skills, strengths, and personal characteristics to employers or graduate school representatives.
- Prepare professional documents, develop your social media identity, and hone your interviewing and networking skills.
- Connect with hundreds of employers and graduate school representatives who visit the campus each year seeking interns and full-time candidates through our job fairs, networking and etiquette dining events, online tools, and more.
Internships

Over 1,000 Oswego students participate annually in internships and Co-ops. The possibilities are endless. Here are just a few examples:

- ABC, CBS, ESPN, MTV, and CMT
- Ameriprise Financial
- Biogen
- Elvis Duran & The Morning Show
- IBM Corporation
- Major League Baseball
- Merrill Lynch
- National Academy of Television Arts & Sciences
- National Grid
- National Weather Service
- N.A.S.A. Jet Propulsion Laboratory
- New York Islanders
- New York State Assembly
- Saab Sensis
- Time Warner
- The Kingdom Wildlife Sanctuary
- U.S. Marshalls Service
- Walt Disney World
- Wegmans
- Xerox
- And more!

Find your own horizons at the Compass.
Campus Life

Oswego is a great place to build your future—and have a wonderful time doing it. Experience life to its fullest by enjoying all that our vibrant campus has to offer.

“My extracurricular activities have given me a family here at Oswego. The support from my peers has made it easier being far from home.”

Lucy Bergemann '17
Meteorology
Westwood, Massachusetts
d in the future.
Welcome home.

**Residence Life**
At SUNY Oswego, you’ll find 12 residence communities—every one a unique environment. The smaller halls each house approximately 200-250 students, while the larger ones accommodate between 400 and 600. The Mackin Complex houses approximately 250 first-year and transfer students, and Sheldon Hall is home to other transfer students. Our newest community—The Village—provides townhouse accommodations for 350 upper class and graduate students in a scenic and convenient location. Residents may request buildings, roommates, and the overall living environment that’s right for them.

All residence halls require ID card access, and feature service desks, kitchen and laundry facilities, and vending machines. Room amenities include beds, desks, chairs, dressers, and closets or armoires—plus cable television and high-speed wireless Internet.

**For more details, visit oswego.edu/reslife.**
**Themed Halls**

In addition to traditional residence halls, SUNY Oswego offers several themed living environments. Hart Hall Global Living and Learning Center emphasizes community, social, and global responsibility and features live-in faculty. Johnson Hall residents participate in our nationally recognized First Year Residential Experience (FYRE), which focuses on current and future student success. Participants in Living and Learning Communities (LLCs) live in the same residence halls, take classes with students who share similar interests, and enjoy opportunities to connect with faculty and staff.

**Dining** always features fresh food with plenty of healthy selections. Our four all-you-care-to-eat resident dining halls are open seven days a week, and we offer a declining-balance “Laker Dining Dollars” account that allows you to purchase meals and snacks at other on-campus eateries. For more details, see [oswego.edu/diningmenu](http://oswego.edu/diningmenu).

In a national survey, our customers rated Oswego Dining Services significantly better than the national average in service and quality.
There’s always something to do.

Enjoy excellent live theatre and exhibits by well-known artists. Take in a performance, comedy show, or concert. Or attend special events.

Recent performances have included Goo Goo Dolls, O.A.R., Third Eye Blind, We the Kings, Motion City Soundtrack, Say Anything, J. Cole, Sammy Adams, Lupe Fiasco, and Grammy-award-winning a cappella ensemble Sweet Honey in the Rock—plus comedy acts like the Dave Chappelle Comedy Troupe, Jim Breuer, and Ralphie May.

Walk the mile-long lakeshore. Use our nearly 700 acres to jog or cycle. Rollerblade the miles of roadway that wind around our buildings.

If you love the outdoors, you’ll enjoy every season, from the gorgeous blaze of autumn to silent winter snowfalls, from the colorful blossoms of spring to summer’s hundred shades of green.

And there’s nowhere better to see them than at Fallbrook, SUNY Oswego’s own outdoor recreational center—with a ski lodge, mountain bike and hiking trails, hills perfect for sledding, and peaceful stretches of countryside for cross-country skiing.
Enjoy a wide range of athletic programs

Oswego’s intercollegiate teams play 24 NCAA Division III men’s and women’s sports, and participate in the SUNY Athletic Conference, the Eastern College Athletic Conference, and the Empire Collegiate Wrestling Conference.

Our intramural, recreation, and club sports program offers more than 40 intramural and club sports—including flag football, basketball, broomball, ice hockey, soccer, softball, Ultimate Frisbee, volleyball, and more.

The Marano Campus Center’s ice arena is home to the 2007 NCAA Men’s Ice Hockey Champion Oswego State Lakers. Two athletic centers house full gyms, two six-lane swimming pools, a diving well, racquetball courts, and dance studios. Other facilities include ten athletic fields including a new artificial turf field, two membership fitness centers, tennis courts, weight training, and more.

You can also enjoy everything from tennis tournaments and golf clinics to Winterfest activities.

You want it, we’ve got it! oswego.edu/campusrec or athletics.oswego.edu.

“My classes gave me the foundation to begin my professional career and my extracurricular activities helped me apply my knowledge outside the classroom.”

For the latest complete list, see the Directory of Registered Organizations at oswego.edu/studentorgs.
As part of the State University of New York, SUNY Oswego’s overall cost for tuition, fees, and room and board for New York State residents is typically less than half the average cost of private colleges and universities.

Most students receive financial assistance based on merit or on student and family need. Oswego’s Presidential and Merit Scholarship Program awards over $4 million in merit-based aid annually for undergraduate students. In addition, students receive approximately $80 million in financial aid annually through various grants, loans, and part-time employment.

The Oswego Guarantee
A promise that your room and board fees will be frozen for four years, that the courses you’ll need to graduate will be offered, and that small classes will continue to be available.

### Annual Expenses for Students Entering Fall ’15 or Spring ’16

**Freshman Admissions**

SUNY Oswego is highly competitive, and annually receives approximately 10,000 freshman applications for just 1,400 places. Consequently, one of our main admissions criteria is the strength of your high school program. A college preparatory curriculum—four years each of English and social studies, a foreign language, and at least seven combined years of math and science—is strongly preferred.

**Application Process**

SUNY Oswego accepts either the SUNY Application or The Common Application. Transcripts and the required SAT (Oswego code is 2543) or ACT (Oswego code is 2942) score results tell only part of the story; we also require a recommendation, information about activities, and an essay. This is your chance to tell us about yourself—your goals, your activities, your accomplishments—and help us decide whether SUNY Oswego is right for you.

**When to Apply**

We strongly recommend that you submit your application before January 15 for the fall semester, and before October 15 for the spring. After these dates, all applications are considered on a space-available basis!

**Early Decision**

If you’re already committed to SUNY Oswego as your first choice, get a head start with our binding Early Decision option. By submitting your application marked for early decision by November 30, you’ll receive a decision by December 15. You’ll still receive full consideration for any and all scholarships.

**Apply Online oswego.edu/apply.**

---

**Transfer Students**

When you apply to transfer to SUNY Oswego, your cumulative college grade point average and the courses you’ve taken will be the primary admissions criteria. Some programs also have their own specific requirements. You’ll need to submit an official transcript from each college or university you’ve attended; if you have completed less than two full-time semesters of college, your official high school transcript is required.

At SUNY Oswego, credits from regionally accredited colleges transfer easily. If you’d like to know for sure, we’ll be glad to evaluate your credits anytime, course by course. To learn more about transfer opportunities at SUNY Oswego, call the Office of Admissions to speak with a transfer counselor.

For specific details, contact the Office of Admissions or check the admissions website at oswego.edu/admissions. Apply Online oswego.edu/apply.

---

The College Personal Safety Task Force will provide upon request all campus crime statistics as reported to the United States Department of Education. Campus crime statistics are available at the University Police website, police.oswego.edu and at the U. S. Department of Education website, ope.ed.gov/security/. The designated campus contact for providing campus crime statistics for the College is the Chief of University Police (315.312.5555).
Applying for Financial Aid.

To be considered for financial aid, you must file a Free Application for Federal Student Aid (FAFSA) with the U.S. Department of Education. Applications can be filed electronically on the Web (fafsa.gov). Be sure to authorize us to receive the information by entering SUNY Oswego, Federal Code number 002848, on the form.

Once we receive the information, you will be considered for the Federal Pell Grant and Federal Stafford Loan. **File the FAFSA by February 15** (November 15 for spring admissions), and you will also be given priority for Federal Work Study, Perkins Loans, and Supplemental Educational Opportunity Grants. While completing the FAFSA online, New York State Residents will be given the opportunity to complete the TAP application.

After you’re accepted for admission to SUNY Oswego, the Office of Financial Aid will notify you of your award by mail, starting in early February. For more detailed information, call 315.312.2248 or write:

**SUNY Oswego**  
Office of Financial Aid  
206 Culkin Hall  
Oswego, New York 13126  
oswego.edu/financial

SUNY Oswego provides equal opportunity in admission without regard to sex, race, color, creed, national origin or disability.
How to get to SUNY Oswego.

Just 35 miles northwest of Syracuse and 65 miles east of Rochester, SUNY Oswego is easily accessible by car, air, rail—even boat!

The main entrance to campus is on Route 104, near the western limits of the city of Oswego. If traveling by rail or air, connecting bus service to Oswego can be made through the Regional Transportation Center in Syracuse. Public transportation schedules and ticketing information are available through:

- Amtrak (Syracuse) ................................................. 800.872.7245
- Greyhound Bus Lines............................................. 800.231.2222
- Centro Bus Service (Syracuse-Oswego).............. 315.442.3400
- Hancock International Airport (Syracuse)......... Call Servicing Airline
- Regional Transportation Center (Syracuse) ......... 315.478.1936

Get updated travel, bus, and train information at oswego.edu/about/visit/directions.

Driving Directions
Get directions from your GPS or Google Maps by entering 72 Sheldon Avenue, Oswego, NY. (Intersection of Washington Boulevard and Sheldon Avenue)

45 minutes north of Syracuse
5 hours northwest of NYC
5 hours north of Philadelphia, PA

Oswego State University of New York
Discover your unlimited horizons on the shining shore of Lake Ontario.

The best way to experience SUNY Oswego? Visit our campus in person.

The Office of Admissions welcomes appointments year round, Monday through Friday and on selected Saturdays. Group information programs and student-guided tours are also available.

Just schedule online at oswego.edu/admissions or give us a call to arrange your visit.

One of the world’s greatest lakes is waiting for you, right on the edge of campus.

Take a virtual tour and look around campus online at oswego.edu/virtualtour.
Getting around is easy!

Our beautiful, 696-acre lakeside campus includes 56 buildings—all within walking distance of each other. Rather ride? A free shuttle bus system operates Monday through Friday. There’s also plenty of convenient parking.

To learn more, call the Office of Admissions for a free Campus Guide.
