

Images of Jim Seago and others; most photos by Marilyn Seago or Jim; former Oswego students with graduation years (year).

Waiting for an image on the screen at the Zeiss Axiophot Epifluorescence microscope, digital camera, and computer in Carol Peterson's lab at the University of Waterloo, Ontario.

Warming up my trombone before a November 2006 Oswego College Concert Band performance; my double bass; on my bike-2004.

Snow – winter and summer: on the Athabasca Glacier in the Canadian Rockies in July 2006 with my wife, Marilyn. Working in January on a wetland bordering Lake Ontario, but why during the middle of winter? This is an icy, snowy way to harvest cattail rhizomes without getting wet.

Former Oswego students and colleagues

Even former students and co-authors get (?) to work in the snow -Jen Broderick (1999), but usually are more comfortable in the lab -Laura Kinsley (1999).

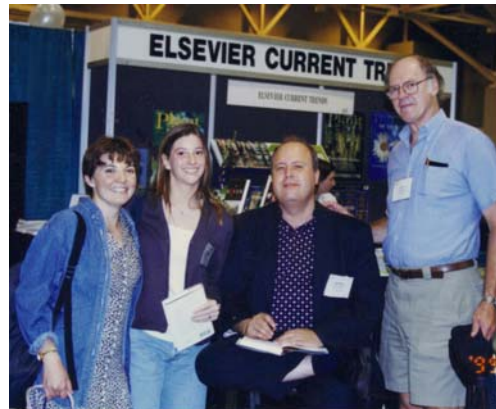

With my mentor and colleague, the late Charlie Heimsch [1914-2003], and with former students at the 2002 Botanical Society of America meetings in Madison Wisconsin. Left to right: Heimsch; Seago; Jill Shipman (1975); Hilary McManus (1998); Jaime Welch (2002); Joe Armstrong (1970; Prof at Illinois State U).

With Willow Eyres (2005), relaxing at an outdoor restaurant in Vienna, Austria, after our presentations at the XVI International Botanical Congress in Vienna, 2005 [left]; with Steve Wolniak (1972; Prof U of Maryland) [right].

Years ago, at the 1999 International Botanical Congress in St. Louis, Shelby Mattison (1996), Hilary McManus (1998), Peter Bernhardt (1974; Prof at St. Louis U), and me at Peter's book signing for "The Rose's Kiss".

Measuring a downed tree with friend and Emeritus Professor Lee Marsh; Lee and I sometimes study more than wetland plants.

Students and classes

Jorge Ortega (2006) using the Zeiss scope at Waterloo; Alaina Netto and Jesse Rosenstock at their plants in the Oswego Botany lab 2006.

Students presenting before an Environmental & Population Biology class [left; 2004] and a Plants & Society class [right; 2005].

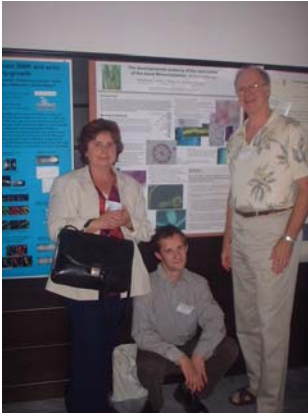

The spring 2006 Topics in Modern in Modern Biology class [left] and Problems in Biology class [right] at the Seago's.

Holding a discussion in an Evolution class at our home, 2005; everyone knows who is talking most.

Colleagues overseas

With my Czech colleagues, Olga Votrubová and Aleš Soukup, at our poster at the Sixth International Root Conference in Stare Lesna, Slovakia, 2004 [left] and in Trebon, Czech Republic, with Czech colleagues, Aleš, Hana, me, Olga, Edita, and Lenka [right].

Fellow root specialists, Ichirou Karahara [Japan] and Ali Lux [Slovakia], with me in a woods near the Danube River in southern Slovakia 2005 [left]; Ichirou and I, with Ali looking on, decide not to test the rushing waters of the flooded Danube River to get a plant [right].

Genetics: long-legged human and short-legged canine

With daughter, Kiki, and twin granddaughters, Sierra and Elle; son, Mac, the guitarist (1997); Breezy, our long-haired, standard dachshund.
