Enhance Your Graduate Studies
Pursue A Co-op

What is Co-op?

SUNY Oswego’s Cooperative Education Program is an academic platform designed to complement a student’s formal education with a practical full-time, paid work experience directly related to the student’s programs or career interests.

Graduate Programs with Co-op

Students who strive in their major develop strong ties through Co-op positions in the following programs:

- Master of Business (MBA)
  - Accounting
  - Management
- Master of Art (MA)
  - Art
  - English
  - Human Computer Interaction
- Master of Science (MS)
  - Chemistry

Why Co-op?

A Co-op brings enormous benefits:

- Integrate classroom study with real world experience
- Develop a network of professional contacts
- Earn a competitive wage while on Co-op
- Save more and borrow less toward college education
- More likely to secure employment after graduation

What Students are Saying

“What Co-op asks you to do is you take the questions and topics that you learned at school, and find out how they apply to the real world in a company setting. What you learn there in your work place is how the information really applies.”

- Marshall Ennis, Co-op at Welch Allyn, Summer, 2012, MA, English
