

## **Learning Objectives**

1. To gain an understanding of the administrative involvement in regards to the delivery of healthcare.
2. To gain an understanding of what educational preparation is necessary for entry into physical therapy positions.
3. To learn how a patients' families are involved in the overall care of a patient.
4. To gain an understanding of the various treatments and technologies that are used in delivering physical therapy.
5. To gain an understanding of the different way(s) care is provided to different populations (i.e. gender, age).

\* My personalized learning objectives are as follows:

- 1.
- 2.
- 3.
- 4.

## **Means of Evaluation**

1. Reflective Journal – a journal must be kept for every visit to the hospital or area facility. The journal will be randomly reviewed by both the site supervisor and the faculty sponsor.
2. Students must prepare two written reports about two different physical therapy-related conditions or therapies, which is up the student. The papers will be at least 8-10 pages in length and must use at least 6-8 primary references. References can only be used from the internet if they are a re-print of an article. No unedited references are permitted. All written materials must be done on a work processor with double spacing, 1” margins on all sides, and 12-point New Times Roman font.
