The Educational Administration Department at Oswego State will offer its Certificate of Advanced Studies (CAS) in Finger Lakes Area. The CAS program includes 24 hours of coursework selected under advisement from the courses listed at the left and a 9-hour internship. The program leads to full certification in school administration.

About the Program

Our program in the Finger Lakes Area area is a collaborative effort between the educational administration professors and area schools:

- Area administrators serve as guest speakers, co-teachers, or instructors in nearly all courses.
- The department works with school districts to help identify high quality internships.
- The department maintains a strong placement program, serving as a liaison between graduates pursuing employment and districts desiring to hire new administrators.
- The department is committed to the advancement of women and minorities in school administration.
- Teams of students work on “authentic” learning assignments in area schools.
