SUNY PANEL PRESENTATION (60-90 minutes, 90 minute preferred):

"Lessons Learned: Using Data to Improve Teacher Education Programs"

Drs. Betsy Balzano (SUNY Brockport), Karen Bell (SUNY New Paltz), Joanne Curran (SUNY Oneonta), Christine Givner (SUNY Fredonia), Virginia Goatley (SUNY Albany), Shawn Van Etten (SUNY Cortland) and Suzanne Weber (SUNY Oswego).

Presenters from institutions across the state will describe how they made data-driven programs improvements to address candidate performance issues, based on common evaluation instruments -- NYSTCE scores, student teaching evaluations, teacher work samples, disposition rubrics, and graduate surveys. (Participants will have opportunities to talk one-on-one to presenters and get handouts at a poster session after the panel discussion.)
