

## How to Make your Blackboard Course Available

Making your course available is easy with the Qwickly Module, located at the top of the right-hand column of Blackboard's Home Tab. The Qwickly Module is visible ONLY to individuals with the Instructor Role in a course.

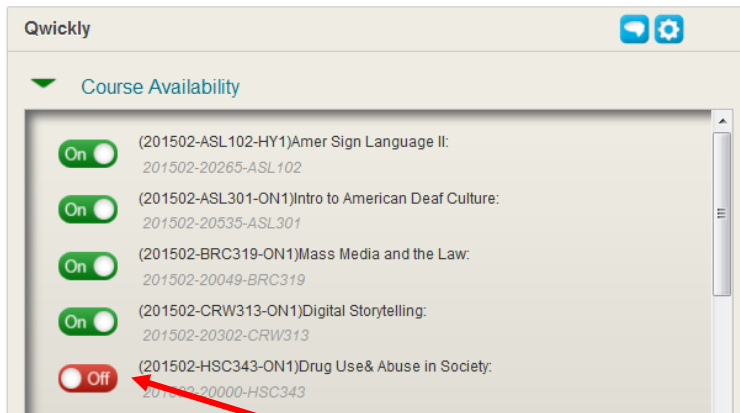

To make your course(s) available:

1. Click on the Course Availability link.

2. A list of all courses that you have an Instructor role in will expand, showing you which courses have been made available (ON) and which are unavailable (OFF).

To make a course available, click on the Off button to the left of the Course name.

3. The course is now available.
