Words of Wisdom

• Advice from the SUNY Oswego Class of 2015 •

1 ORIENT YOUR ATTITUDE

Always keep your future in mind while studying in college. It is essential to have a plan, and to work towards the aforementioned plan. Be involved, seek assistance, build relationships, gain experience, and thrive as a professional.

Don't waste any time in school. Have goals with an action plan to achieve those realistic goals.

Use Career Services, do internships related with to you want to do outside of college and give everything you do your full effort.

Take the time to find yourself.

Be involved, seek assistance, build relationships, gain experience, and thrive as a professional.

Don't settle.

Broaden your horizons. Choose a minor that is not entirely related to your major.

Oswego is what you make it, all opportunities are available to you.

2 CULTIVATE NETWORKS

Get your name out there in a positive way.

Take advantage of all that the Career Services office at SUNY Oswego has to offer. The endless opportunities in which this department provides students and offers to those seeking professional guidance, align nearly every student with success. They truly will help guide you in attaining the professional career in the field in which you have always wanted to work.

Contact and communicate with as many people as possible, you never know who can help you find a great job.

Stay connected with professors and classmates, the more connections the better.

Network with instructors and advisors for professional advice.

Join local associations related to your field.

3 GAIN EXPERIENCE

Employers love to see what you've done outside of the classroom.

I would advise everyone to participate in an internship.

My advice would be to pay attention to building your resume and gaining experience as much as you can before you graduate.

It is difficult to discover what you love without actually doing it.

Internships are a great way to get your foot in the door and show a prospective employer the real you.

Learn as much as you can from your internship.

Studying Abroad played a key role in landing my current job. Take any job or volunteer position that keeps your 'foot in the door' with your career.

4 SUCCESSFULLY LAUNCH

Every interview is an incredible learning experience, even if you don't get a job offer from it. Set a goal and take all the steps necessary to get there.

Keep applying for jobs and don't get discouraged.

Use Career Services and give everything you do your full effort.

Start applying for jobs before graduation!

I called my current manager and asked him for 15 minutes at a coffee shop to discuss the position. The rest is history.

Take advantage of the Compass and the services that they provide for job and internship searches.

Develop your LinkedIn network. I wouldn't have my job now if it wasn't for connections I made on LinkedIn.

It is important to have a plan laid out for the immediate months following graduation. Work the plan.

Leave college with an impressive resume, not just a degree.
