The Digital Campus

technology for an enhanced Tomorrow

Oswego State
Draft Information Technology Strategic Plan
November 2, 2015
Fall 2014:
- Strategic Planning Steering Committee formed
- Meetings to plan

January 2015:
- Strategic Planning Kickoff Events:
  - CTS Jan. 12
  - Event with Ted Dodds & Various stakeholders Jan. 22
  - CTAB

February 2015:
- Focus Group Discussions
  - CLAS
  - Extended Learning

March 2015:
- Focus Group Discussions
  - SCMA
  - SOE

April 2015:
- Focus Group Discussions
  - SOB
  - Alumni

May 2015:
- Focus Group Discussions
  - President Stanley
  - Human Resources
  - Registrar
  - ITC

June/July 2015:
- Outline & Draft Strategic Planning Steering Committee

Fall 2015:
- Draft Strategic Plan written
  - Input from Key Stakeholders & Campus
  - Publish Draft on Web

Dec. 2015:
- Dec. 2015
  - Finalize Strategic Plan
The Digital Campus — Technology for an Enhanced Tomorrow

Draft Plan
November 2, 2015

What is The Digital Campus? Through our extensive planning process, we have asked that question to over 200 community members of SUNY Oswego. Throughout this document, we have summarized responses into a narrative. Some of the answers told us that The Digital Campus consists of

- seamless anytime, anywhere access
- systems that are intuitive to use
- a highly skilled workforce that utilizes technology
- easy, secure access to data to support decision making and initiatives
- technology that is utilized in new and innovative ways.
- access to the services essential to thrive and succeed

"The Digital Campus - technology for an enhanced Tomorrow" is intended to be a campus Information Technology strategic plan which moves us towards the vision that the community has voiced. The plan is intended to tightly align with the strategic priorities outlined in the College’s Tomorrow - Greater Impact and Success plan.

This is the second IT strategic plan for the College. The first plan achieved a more stable and robust infrastructure including enhanced wireless and internet access, improved classroom spaces, increased access to technology for students in the classroom and enhanced administrative systems and processes. It is the intent of this plan to continue to build on these successes and utilize technology in new and innovative ways.

It is recognized there is a need to build nimbleness and agility into the plan to support the ever changing state of technology and the dynamic needs of our students. We are confident we are meeting the needs of our current students, but we need to continue to innovate for the student of the future. This future includes staying true to our role as a residential college as well as prepare our students for the lifelong learning they will require.

Collaboration and communication are key to all technology initiatives. Planning, projects and service delivery need to be done as partnerships with stakeholders and Campus Technology Services (CTS) contributing equally to deliver value to our community. Oswego has a great history of student centeredness to bring focus to the work required to reach the goals as outlined in this plan.

The plan is intended to address the needs of all stakeholders. This includes not only the faculty, staff and students on campus, but also those with distance and satellite locations. It also
recognizes our need to provide service to other constituencies, such as our alumni, and the broader community of Oswego, SUNY and Central New York.

The plan is intended to be a guide, with annual review and assessment. We need to stay true to the priorities of the institution and utilize technology to move us as efficiently as possible.

Finally, the plan is comprehensive and an effective tool to guide decision making to help us build the digital campus that enables our community to thrive and meet the grand challenges of our time.

**College and SUNY Context**

With the release of the College's strategic plan *Tomorrow - Greater Impact and Success*, Oswego has reaffirmed its mission and vision and identified five impacts that lay the foundation for what our work eventually means.

The *Tomorrow* plan is aligned with the SUNY Excels plan which addresses success by working together—and channeling systemness. The goals of the Digital Campus directly address the priorities and will play a role in Oswego achieving the goals outlined in SUNY Excels.

*Mission*

Our mission is to contribute to the common good by lighting the path to wisdom and empowering women and men to pursue meaningful lives as productive, responsible citizens.

*Vision*

Inspired by a shared commitment to excellence and the desire to transcend traditional higher-education boundaries, SUNY Oswego will be a premier institution that provides a transformative experience to a diverse body of students, empowering them to live ethical and meaningful lives and build a better world.

*Impacts*

1. Our students and graduates thrive & succeed
2. Our education ecosystem is highly collaborative and engaged
3. Our communities and partnerships are enriched and supported
4. Our institution is highly effective and sustainable.
5. Our faculty, staff and students move the dial on grand challenges of our time.

The *Tomorrow* plan introduces Performance Drivers, Key Indicators and Impacts that will drive the institution forward. It is recognized that technology will be a tool in support of both achieving success with many of the drivers identified in the plan, and in assessing the success of the plan.
As Oswego’s focus moves to becoming a data-driven decision-making campus, the campus will require systems that provide analysis for timely decision making.

The Tomorrow plan clearly identifies priorities that will help SUNY Oswego continue to thrive as a residential campus and to operate in the evolving enterprise of higher education. This presents Oswego — as well as all of the education sector— with a bold opportunity to move people from prospects to learners to professionals to advocates (all deeply connected to the college digitally). New business models for Higher Education are being explored on our campus, which will require new ways of thinking in the systems we develop and implement.

A focus of the Tomorrow plan is to enhance the College’s impact in our broader community. This includes the physical presence of our branch campus in SUNY Oswego’s Metro Center and other satellite locations, and the virtual extension through the expansion of our programs in Open SUNY. The Digital Campus will support these ambitions by ensuring the technology and infrastructure in these locations support the planned programs and outcomes.

**IT context**

We are living in a time of great technical change. Mobile, social, the cloud and an abundance of data and information are changing the way our community interacts with the environment around us.

Technology is changing people's experience and their expectations. There is constant pressure on IT organizations to offer a “Starbucks experience” and deliver services “as good as Google”. This means: 24/7 seamless access, responsive, robust systems that are intuitive to use and personal in interaction.

Technology is embedded in every aspect of the College.

- Students are bringing more devices than ever before to connect to the network.
- Faculty are adopting mobile devices and tablets into their classroom.
- Students expect an “at home” experience in their residence.
- New niche applications in the cloud are helping streamline administrative tasks to help faculty, staff and students be more productive.
- Digital materials are used increasingly in the classroom.
- Instructional technology is providing constructs that are engaging students in rich and meaningful online and classroom experiences.
- There is increased need to manage and secure data, convert it into information, and use it for effective decision-making, problem solving and opportunities.

As a result of these increasing demands, CTS must deliver service at a faster pace than in years past. The Tomorrow plan is an evolving document; agility and nimbleness will be required.
to deliver the services and projects required for the College to achieve the expected impact. Many of the projects require a new way of thinking to deliver systems, services and projects in this digital landscape. As IT professionals, we must examine the role technology will take, and collaborate and adapt with stakeholders to ensure the achievement of clearly stated strategic outcomes.

Feedback indicates that CTS is a strong organization that can build on successes from the past. Talented staff and a strong infrastructure leave the College in a position to collaborate with others across the college to achieve more. It is clear that IT touches all operations at the college. And, the dependence on technology is only going to increase in the years’ ahead as every department and unit on campus is becoming more integrated in the use of technology.

Draft plan - November 2, 2015
Goals

1. Students, faculty and staff thrive by seamlessly integrating technology into their teaching, learning and scholarly activities.
2. Our community is efficient and creates value with our technical resources.
3. Service excellence provides efficient support through robust, green and secure infrastructure and processes.
4. Effective IT planning and governance ensure campus priorities are achieved.

Goal 1 - Students, faculty and staff succeed by seamlessly integrating technology into their teaching, learning and research

*The digitally enhanced campus is a community that implements technology, embraces change, thinks of the future and the next generation, and strives to make our campus, programs, and students successful. It provides every student with the tools they need to ensure a successful academic tenure, moving from acceptance to graduation in a timely manner.*

Objective 1 - Provide a digitally rich ecosystem that respects the affordability of education and encourages access to technology

*Initiatives*

i. Seamless network access for our entire community
ii. Well managed technology lifecycle replacements for faculty and staff in the laboratory, office and the classroom to support teaching, research and creative activities
iii. Well managed technology lifecycle for lab spaces that supports learning and research objectives and compliments the technology they own
iv. Support implementation of new technologies including mobile to support teaching, learning, knowledge creation and consumption

Objective 2 - Positions faculty and students for success by addressing access and affordability of teaching and learning resources.

*Initiatives*

i. Projects that introduce new technology to reduce the cost of education and support new learning methodologies
ii. Develop processes to support digital content (Etexts/econtent/Open Educational Resources) in the classroom that reduces the cost of education
iii. Provide students with access to software and technology that will position them to succeed in the workplace or graduate/professional school

Draft plan - November 2, 2015
iv. Support innovation by continuing to provide opportunities for departments to gain access to necessary hardware and software through competitive processes such as Technology Innovation Program (TIP) grants
v. Enhance and increase the use of lecture capture to ensure students have easy access to classroom materials
vi. Provide technology that supports innovative and adaptive experiences
vii. Communicate with students, faculty and staff the technological resources available to them

Goal 2 - Our community is efficient and creates value with our technical resources

The digitally enhanced campus communicates and delivers information seamlessly and efficiently. It allows faculty, staff, and administration to focus on their teaching, scholarship and work. It provides the necessary data and information to support timely decision-making.

A digitally enhanced campus has efficient processes and personnel who are adept practitioners of their craft, are partners with the community in enabling their success, communicate well, and deliver results.

Objective 1 - Support student success by leveraging technology to enable data-driven decision making

Initiatives
i. Examine and implement technologies that assist with student success including retention and completion
ii. Examine and implement technologies that assist in the implementation and measurement of the Tomorrow plan
iii. Examine and implement a Client Relationship Management system that assists with managing relationships from prospect to alumni

Objective 2 - Support new digital business models by ensuring systems and processes are agile

Initiatives
i. Develop processes and procedures to support departmental implementation of cloud technologies
ii. Implement new digital workflows that eliminate paper, reduce cycle times and provide efficient and secure information exchange

Objective 3 - Ensure core administrative systems enable enhanced service to our communities

Initiatives

Draft plan - November 2, 2015
i. Develop a plan to implement Banner XE and other supporting administrative applications that ensures Oswego remains at the leading edge of student service delivery

ii. Develop systems and processes that provide relevant information through the web that also supports mobile and social platforms to our stakeholders

iii. Enhance our administration and information systems to provide a more individualized and personal experience both on the web and with mobile devices.

**Goal 3 - Service excellence provides efficient support through robust, green and secure infrastructure and user-friendly processes**

_A digitally enhanced campus is a home to students and faculty throughout the year who rely upon the stability of the infrastructure, depend upon the security, and push the limits of its possibilities. It integrates seamlessly into their learning and lifestyle._

_A digitally enhanced campus has a green and healthy infrastructure and an IT support department with efficient processes. Staff who are expert practitioners of their craft, are partners with the community in enabling their success, communicate well and deliver results._

**Objective 1 - Provide a robust infrastructure that delivers anytime, anywhere service**

_Initiatives_

i. Ensure ample internet bandwidth to meet growing academic, scholarly and residence needs

ii. Ensure wireless connectivity meets requirements for learning and teaching needs in academic areas and delivers an at-home experience in the residences

iii. Improve the main data center in Culkin to reduce footprint and environmental impact

iv. Implement technology lifecycles to ensure servers and network infrastructure meet current requirements

v. Examine and implement technologies that simplify secure off-campus access

**Objective 2 - Balance openness, agility and security**

_Initiatives_

i. Implement Identity Management processes to improve service and reduce risk

ii. Implement Disaster Recovery system, and examine and mitigate Disaster Recovery risks

iii. Examine and update security policies

Draft plan - November 2, 2015
iv. Continually improve security awareness through widespread communication of security risks and initiatives

**Objective 3 -** Deliver user-friendly, efficient processes with skilled staff to deliver service excellence

*Initiatives*

i. Implement and improve IT Service Management through continual improvement. Increase the use of analytics, use analytics to improve processes and expand the Service Catalog

ii. Implement effective Project Portfolio Management practices to deliver campus-wide value from all investments and initiatives

iii. Develop staff to have the skill set required to succeed in a dynamic environment

**Goal 4 - Effective IT planning and governance ensure campus priorities are achieved**

*Draft plan - November 2, 2015*

A digitally enhanced campus has a clear roadmap, deliverables, project plans and assessment criteria to achieve its goals. Decisions are timely and value is produced from all investments.

**Objective 1 –** Develop IT funding models that sustain core service, support innovation, and facilitate growth

*Initiatives*

i. Create and implement a flexible multi-year IT capital budget to upgrade and improve campus infrastructure, and address lifecycle replacement.

**Objective 2 –** Implement an IT governance model that oversees the implementation of the strategic plan and assures alignment with strategic goals.

*Initiatives*

i. Create and implement a governance process that has input from all levels of campus; aligns, balances and prioritizes initiatives; ensures technical strategy is aligned with strategic goals. IT initiatives receive value, resources and risk are managed, and performance is measured.
IT Strategic Plan Goals and alignment with CTS projects

**Goal** | **Objective** | **Projects**
---|---|---
1. Students, faculty and staff thrive by seamlessly integrating technology into their teaching, learning and research. | | 
1.1 | Provide a digitally rich ecosystem that respects the affordability of education and encourages access to technology | Guest wireless access  
Faculty Computer Replacement improvement project  
Development of lab space plans for entire campus including replacement cycles and financial responsibilities
1.2 | Ensure our faculty and students have access to teaching and learning resources that respects the cost of education and positions them for success | etexts pilot  
TIP grants  
Mobile strategy - Academic apps
1.3 | Ensure core systems for learning support the goals and objectives of different teaching modalities and lifelong learning | LMS roadmap (Year 2 & 3)  
Panopto implementation  
Expansion of communication plan

2. Our community is efficient and creates value with our technical resources | | 
2.1 | Support student success by leveraging technology to enable data-driven decision making | Starfish implementation  
Series of small administrative applications  
Organizing and Measuring our impact project  
CRM business case
2.2 | Support new digital business models by ensuring systems and processes are agile | Registrar’s Workflow projects  
HR onboarding & offboarding (Yr 2)  
Banner XE Registration
2.3 | Ensure core administrative systems enable enhanced service to our communities | EMS implementation  
Banner XE implementation plan  
Mobile administrative system strategy  
Individualized web experience (Yr 2 & 3)

3. Service Excellence provides efficient support through robust, green and secure infrastructure and processes. | | 
3.1 | Provide a robust infrastructure that delivers anytime, anywhere service | Bandwidth adjustments  
QUILT application for Student Residence  
Develop plan for improvement of student residence wireless systems  
Continue academic wireless system buildout  
Data Center improvement planning and implementation plan and install server infrastructure upgrades
3.2 | Balance openness, agility and security | Identity and Access Management system improvements  
review and update security policies with Security Council  
Communication of Security risks and special events in October
3.3 | Deliver user-friendly, efficient processes with skilled staff to deliver service excellence | Project Portfolio plan  
Next steps in ITSM  
Staff training plans

4. Effective IT planning and governance ensure campus priorities are achieved | | 
4.1 | Develop IT funding models that sustain core service, support innovation, and facilitate growth | Planning for Tyler Hall Phase II, Scales Hall, Wilber Tower, OBCR move downtown and School of Business  
Planning for Residence wireless buildouts  
Planning for lab requirements for next 3-5 years
4.2 | Implement an IT governance model that oversees the implementation of the strategic plan and assures alignment with Collegiate goals | IT Steering Committee
