A. Philosophy and Conceptual Framework of the School of Education, SUNY Oswego

SUNY Oswego’s School of Education

Conceptual Framework

The faculty of the School of Education at Oswego State University believes that the role of schools is to promote authentic learning by all students. The role of educators in meeting that goal is to function as socially conscious catalysts for change who create and sustain school environments where excellence is cherished and social justice flourishes.

The act of weaving a braid is a visual metaphor for the interactive, recursive and transformative nature of the teaching and learning process. Educators continually weave strands of knowledge, practice, reflection, collaboration & leadership, thus creating a complex braided school fabric in which authentic learning is an everyday reality for diverse students. Concern for social justice anchors the educational process; it is the knot at the top of the braid.

Each program at the State University of New York at Oswego has the following goals for its graduates:

SOCIAL JUSTICE – Educators who graduate from Oswego State University are socially conscious catalysts for change who promote authentic learning by all students.

AUTHENTIC LEARNING – Educators provide meaningful opportunities and appropriate support for all students to engage in self-directed inquiry, problem-solving, critical thinking, and reflection in real world and creative contexts.

KNOWLEDGE – Educators have a deep understanding of the organizing concepts, processes and attitudes that comprise the disciplinary knowledge base (including the New York State Learning Standards), the pedagogical knowledge base, and the pedagogical content knowledge base.

PRACTICE – Educators have a rich repertoire of research-based strategies for instruction, assessment, and use of educational technologies, focused on promoting authentic learning by all students.

REFLECTION – Educators continually assess and reflect upon their professional practice in order to change and grow as life-long learners.

COLLABORATION & LEADERSHIP – Educators continually seek opportunities to work together, learn from one another, forge partnerships, and assume positions of responsibility and leadership.
B. CEC Standards for Beginning Special Educators

The MSED Special Education Program in the Curriculum and Instruction Department strives to prepare student teachers who will meet the standards set forth by the Council for Exceptional Children (CEC, 2015).

<table>
<thead>
<tr>
<th>CEC Standard 1. Learner Development and Individual Learning Differences</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning special education professionals understand how exceptionalities may interact with development and learning and use this knowledge to provide meaningful and challenging learning experiences for individuals with exceptionalities. They understand how language, culture, and family background influence the learning of individuals with exceptionalities. Beginning special education professionals use understanding of development and individual differences to respond to the needs of individuals with exceptionalities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CEC Standard 2. Learning Environments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning special education professionals create safe, inclusive, culturally responsive learning environments so that individuals with exceptionalities become active and effective learners and develop emotional well-being, positive social interactions, and self-determination. Through collaboration with general educators and other colleagues, beginning special education professionals create safe, inclusive, culturally responsive learning environments to engage individuals with exceptionalities in meaningful learning activities and social interactions. They use motivational and instructional interventions to teach individuals with exceptionalities how to adapt to different environments. Beginning special education professionals know how to intervene safely and appropriately with individuals with exceptionalities in crisis.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CEC Standard 3. Curricular Content Knowledge</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning special education professionals use knowledge of general and specialized curricula to individualize learning for individuals with exceptionalities. They understand the central concepts, structures of the discipline, and tools of inquiry of the content areas they teach, and can organize this knowledge, integrate cross-disciplinary skills, and develop meaningful learning progressions for individuals with exceptionalities. Beginning special education professionals understand and use general and specialized content knowledge for teaching across curricular content areas to individualize learning for individuals with exceptionalities. They modify general and specialized curricula to make them accessible to individuals with exceptionalities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CEC Standard 4. Assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning special education professionals use multiple methods of assessment and data sources in making educational decisions. They select and use technically sound formal and informal assessments that minimize bias. Beginning special education professionals use knowledge of measurement principles and practices to interpret assessment results and guide educational decisions for individuals with exceptionalities. In collaboration with colleagues and families, beginning special education professionals use multiple types of assessment information in making decisions about individuals with exceptionalities. They engage individuals with exceptionalities to work toward quality learning and performance and provide feedback to guide them.</td>
</tr>
</tbody>
</table>
CEC Standard 5. Instructional Planning and Strategies

Beginning special education professionals select, adapt, and use a repertoire of evidence-based instructional strategies to advance learning of individuals with exceptionalities. They consider individual abilities, interests, learning environments, and cultural and linguistic factors in the selection, development, and adaptation of learning experiences for individuals with exceptionalities. Beginning special education professionals use technologies to support instructional assessment, planning, and delivery for individuals with exceptionalities, and are familiar with augmentative and alternative communication systems and a variety of assistive technologies to support the communication and learning of individuals with exceptionalities. Beginning special education professionals use strategies to enhance language development and communication skills of individuals with exceptionalities. They develop and implement a variety of education and transition plans for individuals with exceptionalities across a wide range of settings and different learning experiences in collaboration with individuals, families, and teams. Beginning special education professionals teach to mastery and promote generalization of learning. They teach cross-disciplinary knowledge and skills such as critical thinking and problem solving to individuals with exceptionalities.

CEC Standard 6. Professional Learning and Ethical Practice

Beginning special education professionals use foundational knowledge of the field and their professional ethical principles and practice standards to inform special education practice, to engage in lifelong learning, and to advance the profession. They use professional ethical principles and professional practice standards to guide their practice. Beginning special education professionals understand how foundational knowledge and current issues influence professional practice. They understand that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services. Beginning special education professionals understand the significance of lifelong learning and participate in professional activities and learning communities, and advance the profession by engaging in activities such as advocacy and mentoring. Beginning special education professionals provide guidance and direction to paraeducators, tutors, and volunteers.

CEC Standard 7. Collaboration

Beginning special education professionals collaborate with families, other educators, related service providers, individuals with exceptionalities, and personnel from community agencies in culturally responsive ways to address the needs of individuals with exceptionalities across a range of learning experiences. They use the theory and elements of effective collaboration, and serve as a collaborative resource to colleagues. Beginning special education professionals use collaboration to promote the well-being of individuals with exceptionalities across a wide range of settings and collaborators.

**SUNY Oswego School of Education has added an additional standard:**

OSWEGO 8. Paraeducator Training and Support

Special educators understand and assume leadership to ensure appropriate roles and responsibilities for paraeducators as members of the instructional team.
Professional Dispositions

Professional dispositions are the habits of mind and resulting behaviors that make it possible for educators to use their professional knowledge and skills to fulfill the vision expressed by the conceptual framework of the School of Education at SUNY Oswego.

Commitment to Authentic Learning and Teaching. Educators exhibit enthusiasm, initiative, and dedication to the task of providing a safe, inclusive, equitable environment for all students to learn at high levels; and seek effective new ideas, diverse perspectives, and relevant information to develop continuously as educators for social justice.

Critical Reflection. Educators exhibit self-awareness and critical inquiry into their own biases and teaching practice within a socio-cultural perspective; and seek and respond appropriately to constructive feedback from others to improve their own practice.

Integrity. Educators exhibit honesty, fairness, trustworthiness; adhere to professional ethics and standards of behavior; recognize and challenge injustice in effective ways; and act in the best interest of all students and others in the learning community.

Collaboration. Educators listen, communicate, and work effectively with others from a variety of diverse backgrounds to provide a safe, inclusive, equitable and shared learning environment.

Advocacy. Educators understand how social structures and power relationships disadvantage some groups of learners; assume an effective leadership role in recognizing and challenging injustice; and act with courage and patience to ensure that all students can learn authentically at high levels in socially just schools.

Socially-Conscious Responsibility. Educators hold themselves accountable for authentic learning by all students; and exhibit initiative, reliability, maturity and sound judgment in implementing equitable best practice for all students and others in the learning community.

Socially-Conscious Respect. Educators demonstrate cultural sensitivity, empathy, caring, and rapport; seek to understand others and believe all students can learn authentically at high levels.

C. Oswego Philosophy of Student Teaching

Student teaching, in order to be a worthwhile experience and to provide maximum results, must be a cooperative enterprise. It involves the student teacher, the cooperating teacher, school administrators and other public school staff, and the college supervisor. Each has a definite responsibility and each complements the other. The fundamental purpose of student teaching is to provide the student teacher with a variety of experiences through which he/she may develop teaching skills that reflect the philosophy and conceptual framework of the SUNY Oswego School of Education and the performance standards for beginning special educators as defined by the Council for Exceptional Children (CEC). Student teaching is an opportunity that permits the student teacher time to synthesize and apply information gathered in previous course work and field placements. During this time the student teacher is expected to develop professional skills in problem solving, assessment and self-reflection. It is expected that a student teacher will be exposed to all the activities of the classroom teacher(s), in the educational setting, and in the community.

The College believes that a successful plan of student teaching is a means of improving the whole program of teacher education both at the pre-service and in-service levels. Many changes in the professional program at
the College are due directly to experiences gained through the student teaching program. It is generally agreed by personnel of cooperating centers that the enthusiasm which student teachers bring to their centers often provides an additional stimulus for local professional improvement.

D. Goals for Student Teaching

- Demonstrate an understanding of both unique and shared roles and responsibilities of special educators as members of instructional teams, as well as school and district level teams/committees.
- Demonstrate advocacy and leadership to support the participation and learning of students with a variety of learning characteristics in inclusive classes and the general education curricula.
- Demonstrate the ability to plan on both a daily and long-range basis using central concepts of the NYS Student Learning Standards, Individual Education Programs (IEPs), Universal Design for Learning, tools of inquiry, and structures of the disciplines to develop meaningful learning experiences appropriate for the full range of pupil’s developmental, educational, cultural, and linguistic needs.
- Demonstrate ability to plan and provide appropriate and powerful individualized instruction in priority areas for special educators (i.e., development of student literacy abilities, positive behaviors, and functional skills).
- Use a variety of authentic instruction and support strategies including educational technology for accomplishment of learning outcomes in all areas of the curriculum, including IEP goals.
- Create a learning environment through motivational strategies that encourages positive social interactions and active engagement in learning for all students.
- Support students’ physical, social, emotional, aesthetic, and intellectual development.
- Support students’ development of critical thinking, problem solving, and performance skills.
- Use communication techniques to support inquiry, collaboration, and supportive interactions.
- Use formal and informal assessment strategies to monitor students’ development and insure continuous intellectual, social, and physical growth.
- Organize and efficiently manage time, space, records, and learning materials to fulfill relevant professional responsibilities (e.g., instruction, assessment, committee participation and leadership).
- Develop effective management strategies that engage students in ethical explorations that promote collaborative problem solving and self-regulation.
- Collect, analyze, and reflect upon the choices and actions made by the teacher candidate and others in the learning environment and seek professional development opportunities.
- Demonstrate effective collaboration and leadership skills in relationship with students, teachers, paraeducators, related service providers, administrators, other staff members, and parents and agencies in the larger community to support students’ learning and well-being.
- Develop or expand a professional teaching portfolio that reflects the experiences and professional accomplishments related to the special educator role.

E. Admission to SPE 591, Student Teaching for MSED Special Education Program

2. Graduate candidates in the MSED Special Education program may enroll in SPE 591, student teaching provided they have satisfied the following requirements in the MSED Special Education Program:

- Completed all Professional graduate course work with B- or better.
- Completed all undergraduate prerequisites and earned Degree Candidacy.
- Maintained an overall GPA of 3.00.
- Successfully completed all prior field experiences (embedded in SPE 515 and SPE 525).
- Completed a written application for student teaching.
F. College Policies

1. Assignment of Field Placements:
   - Field placements in all teacher education majors are made in compliance with university policies for “Internships, Student Teaching, and Other Experiential Placements” found in the SUNY Oswego Student Handbook.
   - Field placements are made only after the teacher candidate has met all program requirements as set forth by the major department.
   - Field placements are made only by the Field Placement Office, based on recommendations from full-time program faculty. Candidates should not contact schools or teachers directly to arrange placements.
   - Field placements are made as close to candidates’ preferred location or residence as feasible given the quality and quantity of available placements, and the legitimate need of other candidates, schools, and college supervisors. Preferred placements are not guaranteed.
   - Field placements that are not accepted by a teacher candidate may be assigned to another. The initial recipient of the assignment may not be assigned until the following quarter or semester.
   - Field placements require that candidates provide their own transportation.
   - Field placement notification will be completed in writing with a letter from the Field Placement Office. If time is an issue, a phone call or email will be used to notify the candidate of a placement.
   - Candidates must comply with school rules, policies, and procedures, including those concerning student safety and management/discipline, teacher attendance, performance and behavior. Candidate attire must meet the standard set by teachers in the school and comply with school dress code(s) for teachers and students.

2. Student Teaching Time Limits: In order to meet the New York State Education Department’s teacher certification regulations, student teaching is offered for one ten-week period during the Fall and Spring semesters only. Student teaching is not offered during winter session or during any of the summer sessions.

3. Attendance: The beginning and ending dates of student teaching placements are established by the official college calendar and/or the department within the framework established by the college calendar. The student teacher is required to:
   - Be at the placement every day that the school is in session and/or teachers are in attendance (with the exception of (1) day to attend a professional development conference), and follow the vacation schedule of the school district to which they are assigned.
   - Work the same hours and schedule, and perform the same duties, as the cooperating teacher.
   - Attend faculty meetings, parent conferences, extracurricular activities, and all other events where teacher participation is expected by the school district, unless the cooperating teacher and/or school administrator determines otherwise.

The student teacher should expect to be in attendance each day school is in session. However, in case of absence or tardiness, due to illness or other unavoidable emergency, the student teacher must:
   - Call the college supervisor, the cooperating teacher, and the school as soon as possible, but no later that one-hour before school starts on the day of the absence.
   - Arrange delivery to the cooperating teacher of all material that the student teacher possesses that are necessary for instruction on the day of the absence.
   - Follow school district policy for reporting and documenting teacher tardiness and absence to school officials.
4. **Employment While Student Teaching**: Working while student teaching is not advisable. However, because of rising costs of a college education, there is currently no regulation prohibiting employment. Student teachers are not permitted to arrive late or leave the school early to accommodate outside work. Should a student teacher choose to be employed and it is the judgment of the supervisor and cooperating teacher that such employment hinders the student teacher's effective performance. The student teacher may be issued an unsatisfactory grade and be removed from student teaching.

5. **Use of Student Teachers as Substitute Teachers**: There are frequently requests for student teachers to substitute for teachers. A student teacher may substitute for the cooperating teacher with certain provisions and under the following conditions:

- The substitution be requested by the cooperating teacher and the student teacher has demonstrated necessary competence.
- The college supervisor and the local administrator must approve the substitution in advance.
- If the student teacher substitutes for more than three days, approval is required from the Curriculum and Instruction Academic Coordinator as well as the college supervisor.
- There will be no approval for a student teacher to substitute for a teacher other than his/her own cooperating teacher.
- No student teacher will be permitted to accept a full-time substituting position.
- Compensation for substitute teaching is governed by each school district policy and is at the discretion of the school district.

6. **Vacations During Student Teaching**: Student teachers will follow the vacation schedule of the school district to which they are assigned and not the College schedule.

7. **Coursework While Student Teaching**: Student teaching is extremely time consuming and requires a great deal of effort. Students are not permitted to enroll in courses other than SPE 540.

8. **Extended Student Teaching Experiences**: The student teaching experience may be extended only when extenuating circumstances (e.g. death of immediate family member, personal serious illness) occur upon recommendation of the college supervisor and the approval of the Curriculum and Instruction Academic Coordinator. The student teacher is expected to student teach on a full day basis for the assigned period.

1. **Grading**: The student teaching grade is determined by the college supervisor in consultation with the cooperating teacher. The grade will be either “S” for satisfactory work, and “U” for unsatisfactory work. Incomplete grades are given only in exceptional cases such as a major health issue or a death of an immediate family member (mother, father, brother or sister). **In order to earn a grade of “S”, all items on the final evaluation must be scored 2 or higher.** Candidates earning a “U” grade must meet with the Academic Coordinator and student teaching supervisor (full time program faculty member) to determine if a second placement is appropriate.

   A student teacher who is asked to leave a placement by school personnel or is removed from a placement by the College for unsatisfactory performance will receive a failing grade for the student teacher placement/course.

10. **Legal Action**: SUNY Oswego expects students to be responsible, ethical and professional in all work environments consistent with the guidelines for on-campus behavior as expressed in the Code of Student Rights, Responsibilities and Conduct, including adherence to federal, state and local laws. Students who engage in experiential placements, both on and off-campus, such as internships, student teaching, practica,
volunteer services, service learning, and field based independent studies are participating in SUNY Oswego-sponsored programs and thus, are subject to the **Code of Student Rights, Responsibilities and Conduct.** Misconduct, poor judgment, and inappropriate actions in any work or volunteer placement may subject the student to dismissal for a specific placement and/or disciplinary action. SUNY Oswego will provide a due process forum to explain the circumstances surrounding the dismissal. SUNY Oswego in such circumstances has no obligations to reassign a student. (SUNY Oswego Student Handbook)

Student Teachers charged with violations of criminal law will be immediately suspended from participation in the field placement and from the teacher education program, until the case is settled or a determination has been made that the situation does not affect performance in the placement or program.

11. **Resolving Problems:** Despite the best intentions and efforts, problems sometimes arise between the student teacher and his or her cooperating teacher. If the problem cannot be resolved, the following steps must be taken in the order listed:

- Contact the college supervisor. She or he will discuss the matter with each party, individually, and arrange and coordinate a meeting for all concerned parties.
- If no satisfactory resolution is reached, contact the Curriculum and Instruction Department Academic Coordinator. The Coordinator will discuss the problem with each party, individually, and coordinate a meeting of all concerned parties.
- If the problem is not resolved at this point, the Chair of the Curriculum and Instruction Department will be consulted.
- If no satisfactory resolution is reached, the procedures stated in SUNY Oswego's Student Handbook should be followed.

**Note:** Early identification of problems is important, as it can serve as a preventive measure. Cooperating teachers should notify the college supervisor if:

- The student teacher is not making adequate progress.
- The student teacher fails to report to the assignment.
- The student teacher is chronically late or absent.
- The student teacher is acting in an unprofessional manner.

Additional information about this policy can be obtained from the College supervisor or the Curriculum and Instruction Academic Coordinator.

12. **Strike Policy:** If a candidate is placed in a district that goes on strike, the following procedures should be followed:

- If a strike is anticipated or goes into effect, the candidate should notify the college supervisor and Director of Field Placement as soon as possible.
- Candidates should not enter the school building during a strike without first obtaining the permission of the cooperating teacher, the school administrator, and the president of the local teacher’s union. If it is necessary for a candidate to enter the building, the cooperating teacher should assist the candidate in obtaining the approval of all required parties.
• During a short term strike of one week or less, the candidate and college supervisor should agree upon a plan to visit other schools, prepare lesson plans, assignments, etc. If the strike is prolonged, it may be necessary to reassign the candidate to another placement.

G. New York Education Law

The following sections of NYS Education Law apply to all Student Teaching placements:

1. **Section 3023**

   Section 3023 of the NYS Education Law requires, in effect, that each school district “save harmless and protect all teachers, practice or cadet teachers, and members of supervisory and administrative staff or employees from financial loss arising out of any claim, demand, suit or judgment by reason of alleged negligence or other act resulting in accidental bodily injury to any person or accidental damage to the property of any person within or without the school building, provided such teacher, practice or cadet teacher … at the time of the accident or injury the individual was acting in the discharge of his duties within the scope of employment or authorized volunteer duties and/or under the direction of the Board of Education”. A student teacher who is involved in any such accident must immediately inform his/her cooperating teacher and school administrator, and notify the college supervisor as soon as possible thereafter.

2. **Section 3001, Subsection 2**

   Education Law states that a student teacher is legally permitted to practice teaching without the presence of the certified teacher in the classroom providing the classroom certified teacher is available at all times and retains supervision of the student teacher.

3. **New York Social Service Law, Section 413**

   Pre-service Teachers, like their In-Service counterparts, are required “to report or cause a report to be made…when they have reasonable cause to suspect that a child coming before them in their professional or official capacity is an abused or maltreated child…” Should a student teacher become aware of information in this regard (s)he is expected to consult with his/her cooperating teacher and school administrator immediately, and contact the college supervisor as soon as possible thereafter. The cooperating teacher and school administrator should provide the student teacher with the name of the individual designated by the district to report matters of abuse or neglect, and should assist the student teachers in the event that a report is filed.

   Training is provided for this in SSHS 1020 – Safe Schools, Healthy Students.

4. **Sections 803a, 804, 806 and 808**

   Training is provided in preventing child abduction (803a), prevention of tobacco, alcohol, and drug abuse (804), safety education (806) and fire and arson prevention (808) in SSHS 1020 Safe Schools, Healthy Schools.

5. **Personal Insurance**
All full-time undergraduate and graduate students at SUNY Oswego, including those enrolled in student teaching courses, are required to carry accident and hospitalization insurance covering themselves, which is available at a group rate through SUNY Oswego’s Auxiliary Services.

**H. Career Planning & Placement Office – Job Search Assistance**

**Career Services.** Career Services at the Compass, 145 Campus Center (315-312-2255), works in collaboration with the teacher candidate, employing officials, and the School of Education. Career Services connects candidates to employers through on- and off-campus recruitment, with the goal of helping candidates secure full-time positions. They additionally assist candidates in preparing and distributing professional résumés and cover letters and preparing for an interview, whether at regional job fairs or in applying to job vacancies via LakerLeads and CareerShift. Career Coach, Jacqueline Wallace, is available to all students who are pursuing a career in education. Candidates can contact her via email or make an appointment online at jacqueline.wallace@oswego.edu.

**PART II: STUDENT TEACHING TEAM: ROLES & RESPONSIBILITIES**

**A. Cooperating Teacher.** Since all SUNY Oswego MSED special education student teachers are certified childhood teachers, the cooperating teacher role is different from working with undergraduate or other student teachers who are in their first full time teaching experience. The cooperating teacher role in this placement focuses on mentoring a new teacher in a professional development experience that focuses on special educator roles and responsibilities. The following list of some of the most important responsibilities is offered to assist the cooperating teacher in planning for and working through the placement with the student teacher. Student teachers and cooperating teachers are individuals who develop their working relationships in many ways. Responsibilities include:

- Become acquainted with the expectations of SUNY Oswego’s MSED Special Education program by reviewing the Student Teaching Handbook. Either the student teacher or the college supervisor can provide you with this information.
- Provide for a time to meet your student teacher, once s/he has contacted you, and orient him/her to your role and responsibilities in your current position and team.
- Provide the student teacher with an appropriate, professional work area.
- Share your philosophy and curriculum with the student teacher.
- Discuss school policies and procedures regarding health and safety, discipline and attendance.
- Help the student teacher to understand the community from which the students come.
- Plan for the student teacher’s involvement as an active, contributing team member from the first day (e.g., supporting students, conducting individual assessments, leading routines).
- Introduce the student teacher to all team members, including general educators, paraeducators and related service providers. Orient the student teacher to each member’s roles within the team.
- Make the student teacher aware of available resources in the building, district, and BOCES.
- Set aside time for daily discussions.
- Familiarize the student teacher with general needs, abilities, and background of students.
- Provide the student teacher with opportunities to observe your approach to effective teaching and management strategies.
- Include the student teacher in your daily planning and lesson assessment.
- Provide the student teacher with curriculum materials.
Monitor the student teacher’s short and long range planning (i.e., review lesson plans).
Identify opportunities within your context for the student teacher to assume leadership and gain experience in priority areas and requirements (e.g., focus student for team planning for positive behavior supports; exploring and implementing specific technologies for one or more students; developing individual support plans for a student with more significant disabilities and training/supporting paraeducators)
Observe instruction and other performance regularly and provide specific feedback, orally or in writing.
Encourage and allow the student teacher to attempt new strategies and develop his/her own teaching style.
Encourage the student teacher to self-reflect about his/her teaching strategies, dispositions, and skills.
Plan for meetings with college supervisor to discuss the student teacher’s progress.
Contact the supervisor at first signs of a problem.
Complete a mid-quarter and final evaluation for the student teacher on hard copy or on line.
Work with the college supervisor to contribute to an assessment of the student teacher’s performance as it relates to competencies for beginning special educators (CEC) and SUNY Oswego program requirements and dispositions.
IF APPROPRIATE write a recommendation within a few days after the completion of the placement.

B. Student Teacher. The student teacher’s role is to assume responsibility for her or his professional development experience in order to further develop and demonstrate professional competencies as a beginning special educator. The experience is intended to enable the student to engage in multiple decision-making roles and self reflection as a special educator in a semi-structured internship with ongoing feedback from experienced mentors (i.e., cooperating teacher and supervisor). In addition to specific competencies, the student teacher should gain an understanding of the professional roles and responsibilities that are central to the special educator role, regardless of service delivery models.

1. Responsibilities:
- Contact the cooperating teacher soon after the placement has been made to become acquainted with the teacher and program and make specific arrangements to begin the placement.
- Become familiar with the service delivery model, program curriculum and materials.
- Become familiar with school rules, policies, routines and facilities.
- Seek out and read the school’s handbook.
- Follow policies and procedures established by the school regarding hours, discipline, and student safety.
- Keep the same hours and schedule as the cooperating teacher, including following the school calendar rather than the college calendar – full-time attendance. Full time attendance is required during student teaching unless there is an extenuating situation such as illness.
- Communicate with cooperating teacher, school personnel (faculty, staff, and administration) and parents, in a professional, tactful manner.
- Conform to standards of behavior and dress consistent with school and community requirements.
- Use discretion in sharing confidential information about students and colleagues.
- Become acquainted with school personnel and their functions.
- Establish professional rapport with students and maintain an appropriate teacher-student relationship.
Demonstrate initiative and professionalism as an active, contributing team member, including, and beyond fulfillment of responsibilities required by the college or supervisor.

Seek constructive criticism from cooperating teacher and college supervisor relative to professional progress.

Participate in school functions, meetings, conferences, and activities as deemed appropriate by the cooperating teacher.

Complete all requirements (see student teaching requirements).

Student teaching can and should be one of the most satisfying aspects of the teacher preparation program. Success depends on the student teacher's ability to adapt to the situation and develop a good working relationship with the cooperating teacher, college supervisor, and others who assist in the learning community. When students approach the semester with a spirit of eagerness and openness, success usually follows quite naturally. The following list of suggestions will help ensure success and avoid problems:

- Minimize other responsibilities during the student teaching semester. Student teaching is a full-time job!
- Take full advantage of each student teaching placement. Be sure to observe other teachers and support staff in addition to your cooperating teacher. Find out the role that others play in the education of the students in your assigned class and be ready to work with them.
- Be as open as possible with the cooperating teacher and college supervisor about concerns. They are there to support you. They want you to successfully complete this experience.
- Ask questions and seek help. Find ways to grow and learn.
- Focus on key areas such as motivating and sustaining student interest, organization, planning, classroom management and discipline, budgeting your time and your students’ time, understanding the content to be taught, monitoring student growth, and self-reflection of your own teaching knowledge, skills, and dispositions.
- Be prepared for an emergency. Know telephone numbers for contacting the cooperating teacher and school. Have an alternate ride planned in case of unforeseen car problems.
- Be on time and prepared for each day, professional meeting, and related extracurricular activities.
2. **Requirements:**

- Full-time attendance.
- Prepare and share daily lesson plans with cooperating teacher for all lessons **prior** to the date of instruction unless your cooperating teacher, building administrator, and/or college supervisor require a different schedule for completing your lesson plans.
- Plan weekly with Cooperating Teacher.
- Participate as an active team member throughout each school day. (E.g., Do not work on required written products during the school day.)
- Participate in all roles and responsibilities of mentor teacher (e.g., team and committee meetings), unless deemed inappropriate by mentor teacher or supervisor.
- Complete all required experiences and products for SPE 591 in a timely manner and with acceptable quality. (See **SPE 591- Special Education Student Teaching Required Activities and Products***)
- Keep a well-organized portfolio/binder with products related to required experiences and have it available daily, on-site for cooperating teacher and supervisor.

*** These activities are required for all student teachers for the MSED Special Education program to ensure opportunities in a range of key competencies and roles as a special educator. However, your participation is **not limited** to these required activities. It is expected that you will become an active team member and participate in many additional roles and activities based on opportunities in your particular setting.

<tr>
<td>Week 1</td>
<td>Shadow mentor  &lt;br&gt; Support and observe students  &lt;br&gt; Review IEPs and records  &lt;br&gt; Write your own PLOP for 3 students, including the individual student who has the most intensive needs.  &lt;br&gt; Identify general education co-teaching partner  &lt;br&gt; Identify literacy and math groups for which you will assume responsibility  &lt;br&gt; Review grade level general education curriculum for students with IEPs.</td>
<td>Present Levels of Performance for 3 students  &lt;br&gt; Develop a “program-at-a-glance” for each of these 3 students  &lt;br&gt; Schedule  &lt;br&gt; Table/chart of all of your mentor’s students with IEPs including grade, expectations in the general education curriculum (same or modified), and summary of IEP priority areas.</td>
</tr>
<tr>
<td>Week 2</td>
<td>Support students with IEPs in general education classes.  &lt;br&gt; Develop general adaptations for routine lesson structures/activities.  &lt;br&gt; Observe and meet with related service providers for 2 students (including student with highest needs).  &lt;br&gt; Individual literacy assessments for students in your literacy groups (e.g., QRI).  &lt;br&gt; Assist with other routine assessments, if possible (e.g., literacy, math)  &lt;br&gt; Attend child study team (building RTI team) meeting(s)</td>
<td>Write professional development goals for this placement in this setting  &lt;br&gt; Written summary—related service goals and implications for learning and participation throughout daily/weekly schedule and across curriculum.  &lt;br&gt; Copies and Brief Summaries: individual literacy assessments (abilities and needs)  &lt;br&gt; Write brief summary of steps for initial pre-referral &amp; referral to CST.</td>
</tr>
<tr>
<td>Week 3</td>
<td>Assume responsibility for planning and providing expert, intensive instruction in literacy for at least one group of students (including students with IEPs).  &lt;br&gt; Plan for and teach/co-teach other small groups as needed (e.g., math)  &lt;br&gt; Keep records of student progress for literacy and other instructional groups (including IEP goals).  &lt;br&gt; Plan for opportunities for formal assessments for identification or annual review.  &lt;br&gt; Identify a student for IEP development.  &lt;br&gt; Identify a student who needs instruction in a school routine or nonacademic skill (e.g., buying lunch, organizing materials).</td>
<td>Literacy lesson plans—one long form and others in short form.  &lt;br&gt; Written reflections on 3 of first week’s literacy lessons.  &lt;br&gt; Lesson plans (at least one long form).  &lt;br&gt; Records of student progress</td>
</tr>
<tr>
<td>Weeks 4-5</td>
<td>Continue above teaching (literacy, etc.) and support responsibilities.  &lt;br&gt; Continue keeping records of student progress.  &lt;br&gt; Choose one student to focus on for planning focused regular class supports. Talk with classroom teacher and observe. Plan supports for two challenging regular class routines (can be specials). Share with team, including TA.  &lt;br&gt; Assess, plan and implement instructional program for a student who needs instruction in a school routine or nonacademic skill.</td>
<td>Literacy lesson plans—one long form and others in short form.  &lt;br&gt; Written reflections on 1 literacy lesson/week.  &lt;br&gt; Records of student progress  &lt;br&gt; Notes and regular class support plan for one student.  &lt;br&gt; Outline differentiated unit overview:</td>
</tr>
<tr>
<td>Weeks 6-9</td>
<td>Share strategies with appropriate teammates (e.g., other teachers, TAs). Identify classroom teacher partner and unit topic (science, social studies or health) for co-planned differentiated unit.</td>
<td>NYS learning standards, unit outcomes, individual outcomes, possible unit assessment activities, possible learning activities, possible technology related activities</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>Weeks 6-9</td>
<td>Continue above teaching (literacy, etc.) and support responsibilities. Assume responsibility for teaching individualized writing as well as reading. Explore and incorporate technology and specific software based on individual student needs in writing (e.g., word processing w/ spell check, word prediction software, screen readers, Inspiration to plan/organize writing, Powerpoint) Utilize technology to enhance participation and access in other curricular areas and school routines as appropriate Continue keeping records of student progress. Co-develop a proactive behavior support plan with classroom teacher, mentor teacher, TA, etc. Implement the plan and monitor progress. Meet after 2 weeks to review and revise as needed. Co-plan and co-teach a general ed content unit with (not for) a classroom teacher partner within the general education classroom that includes some of your students. (one week) Implement formal assessments with your mentor’s support for triennial review or other purpose. Coordinate (draft) IEP development for one student, using the district’s system and forms. Develop a team support schedule that reflects student-staff assignments, student goals and suggested support strategies. Include TA’s and all supported routines (e.g., lunch, arrival, specials).</td>
<td>Literacy lesson plans—one long form and one reflection/analysis /week. Records of student progress Lesson plans reflecting instruction in use of technology &amp; software. Lesson plans, models and student products (e.g., writing products using software, visual schedules using Boardmaker) FBA—all data from meetings and observations Proactive Behavior Support plan including steps for prevention &amp; teaching, people responsible for implementation; record keeping system. UNIT outline + Notes from co-planning meeting(s) 2 differentiated assessment products/ performances (not tests), 5 lesson plans (3 long form, one cooperative learning lesson, one technology related activity). Lesson plans must describe each teacher’s role during each part of lesson. Records of student progress. Copies of formal assessments; brief narrative summary interpreting results. Copy of new IEP Support schedule</td>
</tr>
</tbody>
</table>
C. **College Supervisor.** The college supervisor serves as the student teacher’s teacher and advocate. In addition, the college supervisor serves as the liaison between the college and the school. S/he is an ambassador for the college, sharing the requirements of college programs and expectations for successful student teachers. This is accomplished by the college supervisor observing and giving feedback to the student teacher and conferring with the cooperating teacher and school administrators. Responsibilities include:

- Meet with student teachers before the semester begins to become acquainted and share expectations.
- Be present in the schools during the first two weeks to meet with administrators, cooperating teachers and student teachers to answer questions and clarify expectations. Arrange for a three-way meeting between the student teacher, the cooperating teacher and yourself.
- Explain and clarify the goals and expectations for the student teaching experience to the student teachers, cooperating teachers and administrators.
- Discuss and identify/negotiate opportunities in the particular placement for the student teacher to complete required activities as intended (e.g., planning for and providing individualized literacy instruction).
- Provide your student teachers with a way to contact you, either by phone or email.
- Provide clear directions about the way in which you want the procedures of student teaching carried out – such as submitting weekly reports, assignments, and contacting you in case of an emergency.
- Observe each student teacher in the classroom and confer with him/her at least three times each quarter; complete an observation report for each visit. Encourage student teachers to be self-reflective in their teaching.
- Maintain a file for each student teacher. Include all observation reports and any other anecdotal information.
- Troubleshoot problems that arise. If the problem involves the placement, the Field Placement Office should be notified first. If the problem involves a student’s performance, the Academic Coordinator should be contacted first.
- Determine a schedule for student teachers to complete assignments. Meet with each student mid-quarter and at the end of the quarter to provide evaluation.
- Assist the cooperating teacher in completing the final CEC checklists if necessary.
- Write a recommendation, if appropriate. This is not a requirement.
- Assign final grades.

D. **School Administrator.** As academic leader of the school, the administrator plays a very important role in the student teaching program. The administrator’s role is to help the school community understand and support the student teaching program and to help the student teacher adjust to the total school program. Responsibilities may include:

- Create a positive attitude among school staff, student body, and community regarding the school’s responsibilities in the student teaching program.
- Provide orientation for all student teachers explaining school policies and procedures.
- Assist, if time permits, with the evaluation of the student teacher’s instructional competence and professional potential. While it is understood that the responsibilities of the school administrator are intense and time consuming, it is very helpful for the administrator to observe the student teacher during the student teaching period and offer feedback.
- Assist team members with the assessment of student teacher performance.
- Communicate with the Field Placement Office at 315-312-3098 if and when problems arise.

E. **Field Placement Coordinator.** The Coordinator of Field Placement serves as the liaison between the college and the school systems that participate in our programs. The Coordinator works closely with
college and school personnel in the role of overseeing the placement process for all program-related field experiences as well as student teaching. Responsibilities include:

- Coordinate an office with the responsibility of locating all field placements for Curriculum and Instruction.
- Assist with policy development for field placements.
- Serve as liaison to school districts that participate in the education programs.
- Visit school districts to locate additional placements and to share college policies and program requirements.
- Assign placements and inform candidates of their placements.
- Serve as liaison to school districts when placement related problems occur.
- Participate in college supervisor meetings on a monthly basis.
- Meet with various college personnel and local agencies to gain information about the latest NYS laws affecting student teaching policy.
- Work closely with the Academic Coordinator of the Curriculum & Instruction Department so that field placements and courses correspond appropriately.

F. **Academic Coordinator.** The Academic Coordinator serves as liaison between the School of Education Field Placement Office, the department, and teacher candidates. S/he works closely with the Field Placement Coordinator, faculty, and students to insure that program procedures are followed and requirements are met. Responsibilities include:

- Provide overall leadership and direction for the program.
- Interpret and enforce existing student teaching policies with the advice of department faculty and supervisory staff.
- Revise and/or develop new policies with input from department faculty.
- Meet with teacher candidates demonstrating problems in field placements prior to student teaching.
- Meet with student teachers who demonstrate problems during the student teaching experiences.
- Provide leadership in initiating and developing program changes and improvements as needed.
- Confer with college supervisors in matters related to the student teaching program at monthly meetings.
- Develop forms and materials necessary for proper evaluation and administration of the program.
Teacher Candidate: ________________________________   Date: ______________________________

College Liaison: ________________________________________________________________________

Cooperating Teacher: ___________________________________________________________________

School District: __________________________________       Building: ___________________________

Use the following rubric to evaluate the teacher candidate’s performance in the classroom and within the team on each of the criteria in the categories of Learner Development and Learning Environments; Content Knowledge, Assessment and Instruction; Professional and Ethical Practices and Collaboration. EXAMPLES of performance indicators are offered for each item.

These criteria reflect the Council for Exceptional Children (CEC) Standards for Initial Level Special Educator Preparation and Standards for the following Initial Specialty Set: Individualized General Curriculum and Individualized Independence Curriculum, Combined. These CEC Standards represent a set of knowledge, dispositions, and performances deemed essential for beginning special educators and the expectations that SUNY Oswego School of Education has for its Special Education teacher candidates.

Your ratings should reflect appropriate expectations for the candidate’s current stage of professional development and experience for the special education role (i.e., student teaching for Initial Special Education certification). Please add your comments and feedback at the end of this form.
## Standard 1: Learner Development and Individual Learning Differences

The candidate understands how exceptionalities may interact with development and learning and use this knowledge to provide meaningful and challenging learning experiences for individuals with exceptionalities.

| 2.1 Candidate, through collaboration with general educators and other colleagues, creates safe, inclusive, culturally responsive learning environments to engage individuals with exceptionalities in meaningful learning activities and social interactions. | Consistently builds positive relationships, classroom community, implements engaging instruction and encourages positive behavior. | With some mentor support, actively participates in building positive relationships, classroom community, implements engaging instruction and encourages positive behavior. | Rarely builds positive relationships, classroom community, implements engaging instruction or encourages positive behavior. | • With mentor support, models and shares effective strategies for facilitating relationships between students with various characteristics (e.g., disability, culture, language, gender) with team members  
• Co-plans and implements class routines and flexible groups using accessible curriculum materials for diverse learners  
• Implements effective strategies to build community and promote positive behaviors and relationships.  
• Co-plans, implements, and monitors appropriate individualized supports to maximize motivation and minimize frustration.  
• In collaboration with related service teammates (e.g., occupational therapist), implements and monitors individual sensory stimulation programs directly and indirectly (e.g., teaching assistants) |
| 2.2 Candidate uses motivational and instructional interventions to teach individuals with exceptionalities how to adapt to different environments. | Consistently uses effective motivation strategies and instructional interventions for successful learning. | Frequently uses effective motivation strategies and instructional interventions for successful learning. | Rarely uses effective motivation strategies and instructional interventions for successful learning. | • Actively builds positive relationships, uses student interests; meaningful curriculum and evidence-based behavioral and instructional strategies to maintain student engagement and focus.  
• Proactively implements practices that maximize student engagement, success and positive behaviors |
| 2.3 Candidate intervenes safely and appropriately with individuals with exceptionalities who are in crisis. | Effectively and safely intervenes appropriately during crisis situations. | Intervenes with limited success during crisis situations. | Does not intervene effectively during crisis situations. | • Facilitates collaborative comprehensive functional behavior assessment for student with challenging behaviors.  
• Facilitates collaborative, data-based planning of Positive Behavior Intervention plan (from FBA) which focuses on preventing challenging behavior and teaching new skills  
• Facilitates implementation and monitoring of positive behavior supports and interventions per BIP  
• Uses skills in problem solving, conflict resolution and crisis management when needed. |
Standard 3: Curricular Content Knowledge

**The candidate uses knowledge of general and specialized curricula to individualize learning for individuals with exceptionalities.**

### Standards of Ethical Principles and Practice

| professional and ethical practices across roles and contexts. | decisions regarding professional and ethical practices across roles and contexts. | sometimes demonstrates unprofessional and questionable ethical practices. | • Respects privacy and confidentiality of students and families.  
• Attends and participates in school wide, building-level and classroom meetings with other professionals and parents/guardians (Committee on Special Education, School Based Intervention Team, Response to Intervention team, Transition planning team). Can explain Special education policies, procedures and processes as they relate to students with disabilities.  
• Continually reflects on and adjusts practice |

### 6.2 Candidate understands how foundational knowledge and current issues influence professional practice.

| Can articulate the rights of students and families, and roles and responsibilities of professionals that serve them and interpret these in light of current issues. | Understands the rights of students and families, and roles and responsibilities of professionals that serve them; consults with mentors for applications for some current issues. | Limited understanding of the rights of students and families, and roles and responsibilities of professionals that serve them. | • Understands and can explain rights of students with disabilities and their parents,  
• Understands and can explain roles and responsibilities of teachers and other professionals and staff related to serving students with disabilities,  
• Establishes respectful and productive relationships with all parents and guardians.  
• Understands impact of language and culture on identification and services for students with disabilities and their families. |

### 6.3 Candidate understands that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services.

| Recognizes and thoughtfully responds to the intersection of diversity issues (e.g., family/school culture, language) with special education services | Seeks support from mentors to thoughtfully respond to the intersection of diversity issues (e.g., family/school culture, language) with special education services | Is disinterested in/disrespectful of the intersection of the diverse human characteristics with special education services |  
| Demonstrates active engagement in professional development | Demonstrates limited engagement in professional development | Resists engagement in professional development activities and life-long learning to benefit |

### 6.4 Candidate understands the significance of lifelong learning and participate in professional activities

| Verbal and written communication reflects professional standards.  
| Performs duties in a manner that is consistent with sound ethical and professional practices and legal requirements |

| • Establishes respectful and productive relationships with all parents and guardians.  
• Understands impact of language and culture on identification and services for students with disabilities and their families. |

| Demonstrates active engagement in professional development | Demonstrates limited engagement in professional development | Resists engagement in professional development activities and life-long learning to benefit |  
| Verbal and written communication reflects professional standards.  
| Performs duties in a manner that is consistent with sound ethical and professional practices and legal requirements |
### 6.5 Candidate advances the profession by engaging in activities such as advocacy and mentoring

| Candidate engages in investigations and shares professional learning (e.g., implementing and introducing new tools to teammates, action research, intervention practice and outcomes) with in professional development contexts. | With assistance from mentors, candidate engages in investigations and shares professional learning (e.g., implementing and introducing new tools to teammates, action research, intervention practice and outcomes) with in professional development contexts. | Candidate does attempt to implement new tools or share with team; does not engage appropriately in systematic investigations/sharing effective practices professionally. | Continually reflects on personal biases and the influence of these biases on instruction of students and interactions with other personnel, families and the community (e.g., open to new evidence-based approaches and strategies) | Advocates for appropriate services for individuals with exceptionalities (e.g. AAC evaluation, sensory processing evaluation, use of assistive technology to access curriculum) | Shares examples of emerging practices at conferences, workshops or other professional development contexts | Implements new software tools or other assistive technology with one or more students and shares information with/ trains teammates |

### 6.6 Candidate provides guidance and direction to paraeducators, tutors, and volunteers.

| Provides consistent and well defined guidance and support to paraeducators, based upon evidence-based practices | Occasionally provides guidance and support to paraeducators, based upon evidence-based practices. | Does not provide guidance and support to paraeducators, based upon evidence-based practices. | Co-plans and clarifies paraeducator’s roles and responsibilities within the professional team (e.g., general educators, special area teachers) and for specific contexts and students they serve | Guards against misuse of paraeducators and unintended outcomes (e.g., replacing special education teacher instruction, fostering dependence, limiting peer opportunities) |
Standard 7: Collaboration

**The candidate collaborates with families, other educators, related service providers, individuals with exceptionalities, and personnel from community agencies in culturally responsive ways to address the needs of individuals with exceptionalities across a range of learning experiences.**

**Comments on Overall Performance**

You may wish to include Strengths, Areas of Growth and Priorities for Further Development for the Special Educator Role.
C. Lesson Plans: Required Formats

**Required Guided Reading Lesson Plans**

Special educators must be able to assess students and design and deliver individually appropriate instruction in literacy. Guided reading or other developmental reading lessons must be based upon individual student abilities and needs (per individual assessments) and must reflect student teacher decisions regarding appropriate materials, objectives and procedures to support the student’s developing reading process. Use of scripted or “packaged” commercial teaching materials cannot meet this requirement. Contact your supervisor, if necessary, to negotiate opportunities to ensure that you are able to gain this important experience and meet this critical requirement.

<table>

PART IV: PROGRAM, FIELD PLACEMENT & COURSE DESCRIPTIONS

A. **MSED Special Education: Childhood (Grades 1-6)**. The MSED Special Education-Childhood Education Program (36 sh) leads to Initial Certification in Special Education - Childhood (Grades 1-6) with the MSED Degree and Professional Certification after completing three years of successful teaching. Candidates are required to hold a B.S. or B.A. degree and valid NYSED Teaching Certificate in Childhood Education Grades 1-6, or equivalent. Courses in the program include:

- **SPE 504** Teaching for Inclusive Schooling (3 sh)
- **SPE 507** Collaboration and Co-Teaching (3 sh)
- **SPE 514** Educational Planning: Students with Mild and Moderate Disabilities (3 sh)
- **SPE 515** Educational Planning: Literacy for Special Educators (3 sh)  
  *A 25 Hour Field Experience is a required part of SPE 514 and SPE 515, which includes supervised literacy tutoring for a student who has mild disabilities and needs in literacy.*
- **SPE 516** Educational Planning: Proactive Behavior Supports (3 sh)
- **SPE 521** Educational Planning: Students with Severe Disabilities (3 sh)  
  *A 25 Hour Field Experience is a required part of SPE 521, which includes individualized weekly instruction for a student who has severe disabilities in a local public school.*
- **SPE 525** Educational Planning: Students with Severe Disabilities (3 sh)
- **SPE 537** Assessment for Special Educators (3 sh)
- **SPE 540** Leadership and Program Management for Special Educators (3 sh)  
  *Taken concurrently with SPE 591.*
- **EDU 516** Introduction to Research (3 sh)

Comprehensive Examination  
*After successful completion of all coursework and student teaching.*

B. **Field Placements**

Candidates in the MSED Special Education Childhood program must complete 50-clock hours of supervised, course related field experience and student teaching in the special educator role. Field experiences and student teaching placements ensure that all candidates gain experience at both the primary (1-3) and intermediate (4-6) grade levels. All candidates bring prior experience in high needs and urban schools with socio-economically diverse learners and English Language learners from their initial teacher preparation as classroom teachers. Graduate special education placements also include urban and high needs schools that serve economically, culturally and linguistically diverse learners.

The MSED Special Education Childhood program includes two 25 hour supervised, course-related field experiences and one full time, ten-week student teaching placement (during the regular academic year) in the special educator role. The 25 hour field experiences include one semester focused on serving students who have mild disabilities (with significant emphasis on supporting literacy development and modifying environments) and one semester serving students with severe cognitive disabilities (with focus on modifying environments, individualized goals and positive behavior supports). Student teaching placements are made in the service area in
non-categorical public school programs where candidates serve students with various disabilities and other diverse characteristics. All candidates are supervised for all field experiences and student teaching by full time special education program faculty, in collaboration with public school mentor teachers.

Field experiences are related to three courses. One 25 hour practica is completed as part of a 6 sh fall professional block: SPE 514 (Educational planning for students with mild and moderate disabilities) and SPE 515 (Literacy for special educators). Candidates assess and tutor a student (who has a mild/ moderate disability) in literacy for 12 weeks, as well as conduct school-based observations of the student in her/his school program. At the completion of tutoring, candidates complete a final progress report about the students' progress and recommendations. They also develop a critical analysis of the student's current "full day" literacy program, with recommendations for both the special education and general education components.

The second 25-hour field experience is completed during the spring semester as part of SPE 525 (Educational planning for Students with Severe Disabilities). Candidates serve a student who has a severe cognitive disability. They see the student across an entire day (including general and special education contexts/services) conduct an ecological inventory and parent or teacher interview. Candidates are then required to assess, plan and implement two instructional programs for their focus student, complete with lesson plans and teaching materials. Candidates also complete a detailed critical analysis and reflections of their focus student’s current program. They address such topics as: behavioral support, daily schedule, communication system, related services support, teaming and collaboration, social interactions and relationships, and reducing and eliminating stigma. At the end of the field placement, candidates share instructional program results with mentor teachers.

After completing 21sh in graduate special education coursework (including 50 hours of special education field experience) candidates complete 10 weeks of full time student teaching in the special educator role in a regular public school setting. Required activities and products include individual assessments in literacy and other IEP priorities; instructional plans; designing interventions for literacy, participation and behavior; modifying curricula and environments; collaboration with professionals, paraprofessionals and families, coordinating IEP development, and reflections on emerging understandings of the professional role, implications for advocacy and social justice, and priorities and opportunities for ongoing professional development). The student teaching timeframe (10 weeks) matches participating schools’ marking period for reporting student progress. The 10-week placement supports their team participation in reporting student progress on IEP goals, as well as data for their students’ report cards. The length and structure of the capstone student teaching experience ensure candidates’ attention to student learning as it relates directly to their professional decision-making, as well as strengths and limitations of the student’s program.

E. Course Descriptions

SPE 504, Teaching for Inclusive Schooling (3sh)

This course provides an introduction to federal laws and state regulations for educating students with disabilities. Characteristics of various disabilities will be presented with a focus on educational implications. Course content will emphasize the referral process, roles and responsibilities of general and special educators, effective strategies for meeting individual student needs within the regular classroom (e.g., curriculum, instruction and assessment practices for diverse groups, collaboration of special education -general education teammates), and specialized services and supports. Pre-requisite: Graduate standing
SPE 507 Collaboration and Co-teaching (3sh)

This course explores theoretical and practical issues relevant to contemporary models of collaborative education. Representative topics include strategies for effective communication, parent-professional partnerships, multicultural considerations, team structures, working effectively with paraprofessionals and related service providers, teaming with community-based service providers, facilitation and problem-solving skills, planning effective meetings and strategies for co-planning and co-teaching with general education partners. Pre-requisite: Graduate standing.

SPE 514-515 Educational Planning: Literacy for Students with Mild & Moderate disabilities (6sh)

This course will emphasize decision-making special educators need to co-plan high quality literacy instruction and support for students with mild and moderate disabilities. It will address ways to enhance meaningful participation in authentic literacy routines in general education classes for students with disabilities. The course will also address knowledge and skills to design individual instructional programs in literacy, when needed, to augment general education opportunities. Issues such as individualized assessment, grouping, scheduling, curriculum, materials, guided lesson plans, methods, use of technology and assistive technology for literacy development and instruction will be addressed. This course includes a 25 hours supervised field experience. PREREQUISITE: ADMISSION TO MSED SPECIAL EDUCATION PROGRAM

SPE 521 Educational Planning : Proactive Behavior Supports (3 sh)

This course will emphasize knowledge and skills special educators need to lead team planning to manage the classroom environment and to teach students who need individualized instruction to develop positive behaviors. The course framework will consider a systemic approach (building-classroom-individual) to behavior management and support to help a wide range of students succeed in regular classes and other typical settings. Considerations for learning characteristics of students with challenging behaviors and skills to facilitate Functional Behavioral Assessments and to develop individual Proactive Behavior Support Programs will also be addressed. PREREQUISITE: ADMISSION TO MSED SPECIAL EDUCATION PROGRAM

SPE 525 Educational Planning for students with Severe Disabilities (3 sh)

This course will address knowledge and skills educators need to plan individualized programs for students with severe and multiple disabilities. Emphasis will be on teaching and supporting students within regular classes and typical school activities, based on a vision of childhood and adult participation in typical community activities and settings. Representative topics include learning characteristics of students with severe disabilities, program planning and IEP development, assessment and instructional planning in literacy, communication, functional skills for typical routines, assistive technology, supporting participation and progress in the general education curriculum, social skills and peer relationships. This course includes a 25 hours supervised field experience. PREREQUISITE: ADMISSION TO MSED SPECIAL EDUCATION PROGRAM

SPE 537 Assessment for Special Educators (3 sh)

This course focuses on basic concepts and theory of educational measurement in relation to the selection, interpretation, use, and design of assessment instruments and practices for students with disabilities. Candidates will conduct, interpret and report on assessments for a variety of common purposes including identification, program planning, instructional planning, and monitoring student progress. Course content encompasses non-discriminatory methods of formal and informal assessment for a variety of student characteristics and educational purposes. PREREQUISITE: ADMISSION TO
MSED SPECIAL EDUCATION PROGRAM

SPE 540  Leadership and Program Management for Special Educators (3sh)

This seminar will emphasize synthesis of candidate's understanding of the special educator's unique roles and responsibilities within public school contexts (team, building and district level). Content will include examination and application of knowledge and skills special educators need to fulfill their unique administrative roles and responsibilities. These include program coordination, scheduling staff, scheduling students, co-planning with general education colleagues, strengthening school-family partnerships, training and monitoring paraprofessionals and considerations for model development and restructuring of special education programs.

PREREQUISITE: COMPLETION OF 21 SH IN MSED SPECIAL EDUCATION PROGRAM, CONCURRENT REGISTRATION WITH SPE 591 (STUDENT TEACHING).

SPE 591  Student Teaching in Special Educator Role (9 SH)

This course provides an extended supervised, field-based experience for the participant to integrate knowledge of development, pedagogy, assessment, and research in an elementary setting that provides special education services to students with disabilities (grades 1-6). Each participant will develop and demonstrate key competencies for special educators related to program planning, collaboration and management, assessment, curriculum and instruction (including use of technology), managing learning environments and professional development as they relate to delivering effective programs for students with disabilities in typical public schools.

PREREQUISITE: COMPLETION OF 21 SH IN MSED SPECIAL EDUCATION PROGRAM, CONCURRENT REGISTRATION WITH SPE 540.
