Specific Hazards Present:

- Acute Toxicity (irritant, dermal sensitizer)
- Oxidizer (can cause or contribute to combustion in the presence of oxygen)
- Health Hazard (carcinogen, respiratory sensitizer, reproductive toxicity, toxic to target organs, mutagenicity, aspiration toxicity)
- Corrosive (can damage/destroy metals, causes severe burns to eyes and skin)
- Flammables (liquid flashpoint >200 °F, gas flammable at 68°F, readily combustible solids, self-reactive substances)
- Severe Toxicity (toxic to fatal when swallowed, inhaled or makes contact with skin)
- Explosive
- Environmental Hazard
- Compressed Gas
