SUNY Oswego Facilities Services Monthly Project Update

June, 2017

Project #	100108
Project Name	Extended Learning Program Relocation Space Assignment

Project Scope	<p>This mission was the remodel and erection of the provisional art workspaces transformation into a testing center and salon for students. This was due to the Extended Learning department's relocation to SUNY Oswego's central campus from the Phoenix center.</p> <p>The project scope included moving furniture and equipment from the Phoenix center to the Hewitt Union, painting, adding data drops, as well as relocating computers into the space. The space includes 3 rooms which are now an office for testing personnel with a nice mahogany veneer desk and high executive style chair, as well as bench seating with storage underneath, and a backdrop white panel against the wall for photography of students testing. As we walk through the office area we entire the vitalized testing centers with the west wall stretch across with full length windows. Desks are lined perpendicular to the windows to allow 8 computers in each row stretching back 4 rows. The testing personnel have the front of the room to write any necessary information on the board. Now leaving the space and entering through our new keypad access doorway students given access by extended learning are able to use this relaxing space to sit back, study, lounge, and research items as they journey through the college experience. The room displays new paint, lounge furniture, coffee style tables and rolling chairs, it also includes a computer station.</p>
