

iPad Apps Training Session - Project SMART

Friday 5th April 2013

These are not specifically iPad apps - these are apps that work anywhere (home PCs, laptops, iPads, androids and phones).

1. DROPBOX - www.dropbox.com

Dropbox is a free service that lets you bring your photos, docs, and videos anywhere and share them easily. Never email yourself a file again.

2. EVERNOTE - www.evernote.com

The Evernote family of products help you remember and act upon ideas, projects and experiences across all the computers, phones and tablets you use. Shared documents over the web.

3. WORKFLOWY - www.workflowy.com

WorkFlowy is an organizational tool that makes life easier. It's a powerful way to take notes, make lists, collaborate, brainstorm, plan and generally.

4. DOLPHIN - www.dolphin-browser.com

Dolphin's free mobile browser is available on Android and iOS platforms. Download one of our elite mobile web browsers and enjoy all the free features (such as Flash).

5. REMOTE CONTROL OF PC from iPad

May people say Splashtop is the best (\$4.99) - www.splashtop.com

I demonstrated Teamviewer in class (free) - www.teamviewer.com

There are a whole list of remote control apps here :
